Yuferev,Nathan Ida,2018-09-03 Surface Impedance Boundary Conditions is perhaps the first effort to formalize the concept of SIBC or to extend it to higher orders by providing a comprehensive consistent and thorough approach to the subject The product of nearly 12 years of research on surface impedance this book takes the mystery out of the largely overlooked SIBC It provides an understanding that will help practitioners select use and develop these efficient modeling tools for their own applications Use of SIBC has often been viewed as an esoteric issue and they have been applied in a very limited way incorporated in computation as an ad hoc means of simplifying the treatment for specific problems Apply a Surface Impedance Toolbox to Develop SIBCs for Any Application The book not only outlines the need for SIBC but also offers a simple systematic method for constructing SIBC of any order based on a perturbation approach The formulation of the SIBC within common numerical techniques such as the boundary integral equations method the finite element method and the finite difference method is discussed in detail and elucidated with specific examples Since SIBC are often shunned because their implementation usually requires extensive modification of existing software the authors have mitigated this problem by developing SIBCs which can be incorporated within existing software without system modification The authors also present Conditions of applicability and errors to be expected from SIBC inclusion Analysis of theoretical arguments and mathematical relationships Well known numerical techniques and formulations of SIBC A practical set of guidelines for evaluating SIBC feasibility and maximum errors their use will produce A careful mix of theory and practical aspects this is an excellent tool to help anyone acquire a solid grasp of SIBC and maximize their implementation potential      *The United States Catalog* Mary Burnham,Carol Hurd,1928      *Electrical Engineering* ,1914      *Journal of the American Institute of Electrical Engineers* American Institute of Electrical Engineers,1920 Includes preprints of Transactions of the American Institute of Electrical Engineers ISSN 0096 3860      *Catalog Issue for the Sessions of ...* New Mexico College of Agriculture and Mechanic Arts,New Mexico State University,1914      **Annual Catalogue** College of Hawaii,1915      **Electrical Engineer** ,1890      **Transactions** American Institute of Electrical Engineers,1953 Index of current electrical literature Dec 1887 appended to v 5      *The Industrial Arts Index* ,1927      *Scientific American* ,1897      Electricity ,1916      Electrical Engineer of Australia & New Zealand ,1926      *The Electric Journal* ,1929      **The Engineering Index** ,1929      Evansville College Bulletin ,1926      *1975 IEEE MTT-S International Microwave Symposium* ,1975      **The Mechanical World** ,1914
