Multimodal Composing Lindsay A. Sabatino, Brian Fallon, 2019-04-15. Multimodal Composing provides strategies for writing center directors and consultants working with writers whose texts are visual, technological, creative, and performative. Texts they may be unaccustomed to reading, producing, or tutoring. This book is a focused conversation on how rhetorical design and multimodal principles inform consultation strategies, especially when working with genres that are less familiar or traditional. Multimodal Composing explores the relationship between rhetorical choices, design thinking, accessibility, and technological awareness in the writing center. Each chapter deepens consultants' understanding of multimodal composing by introducing them to important features and practices in a variety of multimodal texts. The chapters' activities provide consultants with an experience that familiarizes them with design thinking and multimodal projects, and a companion website [www.multimodalwritingcenter.org](http://www.multimodalwritingcenter.org) offers access to additional resources that are difficult to reproduce in print and includes updated links to resources and tools. Multimodal projects are becoming the norm across disciplines, and writers expect consultants to have a working knowledge of how to answer their questions. Multimodal Composing introduces consultants to key elements in design technology, audio, and visual media and explains how these elements relate to the rhetorical and expressive nature of written, visual, and spoken communication. Peer, graduate student, professional tutors, and writing center directors will benefit from the activities and strategies presented in this guide.
