data driven processes empowers knowledge workers to know in real time what is happening at the edge points and to take actions through the combination of rule driven guidance and their own know how It is not a traditionally automated system but intelligent automation where technology doesn't merely replace human decision making but extends the reach of the knowledge worker making IoT data actionable As Sandy Kemsley points out in her foreword As adaptive case management ACM systems mature we are moving beyond simple systems that allow knowledge workers to define ad hoc processes to creating more intelligent systems that support and guide them Knowledge workers still need to dynamically add information define activities and collaborate with others in order to get their work done but those are now just the table stakes in a world of big data and intelligent agents To drive innovation and maintain operational efficiencies we need to augment case work typically seen as relying primarily on human intelligence with machine intelligence In other words we need intelligent ACM Highly predictable work is easy to support using traditional programming techniques while unpredictable work cannot be accurately scripted in advance and thus requires the involvement of the knowledge workers themselves The core element of Adaptive Case Management ACM is the support for real time decision making by knowledge workers In award winning case studies covering industries as diverse as law enforcement transportation insurance banking state services and healthcare you will find instructive examples for how to transform your own organization This important book follows these ground breaking best sellers on ACM Thriving on Adaptability Empowering Knowledge Workers Taming the Unpredictable How Knowledge Workers Get Things Done and Mastering the Unpredictable and provides important papers by thought leaders in this field together with practical examples detailed ACM case studies and product reviews

Only Humans Need Apply

Thomas H. Davenport, Julia Kirby, 2016-05-24 An invigorating thought provoking and positive look at the rise of automation that explores how professionals across industries can find sustainable careers in the near future Nearly half of all working Americans could risk losing their jobs because of technology It's not only blue collar jobs at stake Millions of educated knowledge workers writers paralegals assistants medical technicians are threatened by accelerating advances in artificial intelligence The industrial revolution shifted workers from farms to factories In the first era of automation machines relieved humans of manually exhausting work Today Era Two of automation continues to wash across the entire services based economy that has replaced jobs in agriculture and manufacturing Era Three and the rise of AI is dawning Smart computers are demonstrating they are capable of making better decisions than humans Brilliant technologies can now decide learn predict and even comprehend much faster and more accurately than the human brain and their progress is accelerating Where will this leave lawyers nurses teachers and editors In Only Humans Need Apply Thomas Hayes Davenport and Julia Kirby reframe the conversation about automation arguing that the future of increased productivity and business success isn't either human or machine It's both The key is augmentation utilizing technology to help humans work better smarter and faster Instead of viewing these machines as competitive interlopers we can see them as partners and collaborators in
