Fake-Checking Andrea Hickerson, Christopher Schwartz, Matthew Wright, 2025-12-16. Designed to help journalists keep pace with the rapid evolution of deepfakes as well as integrate fake-checking methods into their routine reporting practices, this book offers a concise and accessible guide for reporters navigating this evolving challenge. This guide aims to assist journalists in understanding the complexities of deepfakes from a number of angles, including philosophical, historical, technical, and methodological. Rather than approaching deepfakes as a journalistic apocalypse, this book contextualises them in the larger historical practice of fact-checking and on a continuum of technological advances in image and video manipulation. Encouraging readers to view fact-checking as a multimodal process, it stresses the importance of combining philosophical and technical tools, especially ones based in epistemology and artificial intelligence (AI). In addition to the pavement-pounding essentials of good journalism, the book concludes with a chapter addressing how to explain deepfakes to a public progressively more concerned about the realities and consequences of AI and misinformation. Fake-Checking serves as a practical reference for journalists and advanced media students who are increasingly required to identify and verify potential deepfakes and their future iterations.
