Lead your organization to become evidence driven. Data is the benchmark that informs corporate projections, decision making and analysis. But why do many organizations that see themselves as data driven fail to thrive? In **Leading with AI and Analytics**, two renowned experts from the Kellogg School of Management show business leaders how to transform their organization to become evidence driven, which leads to real measurable changes that can help propel their companies to the top of their industries. The availability of unprecedented technology enabled tools has made AI Artificial Intelligence an essential component of business analytics. But what's often lacking are the leadership skills to integrate these technologies to achieve maximum value. Here the authors provide a comprehensive game plan for developing that all important human factor to get at the heart of data science: the ability to apply analytical thinking to real world problems. Each of these tools and techniques comes to powerful life through a wealth of powerful case studies and real world success stories. Inside you'll find the essential tools to help you: Develop a strong data science intuition quotient. Lead and scale AI and analytics throughout your organization. Move from best guess decision making to evidence based decisions. Craft strategies and tactics to create real impact. Written for anyone in a leadership or management role from C level unit team managers to rising talent, this powerful hands on guide meets today's growing need for real world tools to lead and succeed with data. **PC AI**, 1998.
