Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years including the pandemic
to show how we can respond to three great crises unfolding over the next decade In this revelatory unnerving and ultimately
hopeful book Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises
global health emergencies transformative climate change and the AI revolution Today Americans cannot reach consensus on
any significant political issue and US and Chinese leaders behave as if they re locked in a new Cold War We are squandering
opportunities to meet the challenges that will soon confront us all In coming years humanity will face viruses deadlier and
more infectious than Covid Intensifying climate change will put tens of millions of refugees in flight and require us to
reimagine how we live our daily lives Most dangerous of all new technologies will reshape the geopolitical order disrupting
our livelihoods and destabilizing our societies faster than we can grasp and address their implications The good news Some
farsighted political leaders business decision makers and individual citizens are already collaborating to tackle all these
crises The question that should keep us awake is whether they will work well and quickly enough to limit the fallout and most
importantly whether we can use these crises to innovate our way toward a better world Drawing on strategies both time
honored and cutting edge from the Marshall Plan to the Green New Deal The Power of Crisis provides a roadmap for
surviving even thriving in the 21st century Bremmer shows governments corporations and every concerned citizen how we
