seize new opportunities in a powerfully evolving market *Money God Temples in Taiwan* Fabian Graham, 2025-12-22 This book traces the history and development of Taiwan's new money god tradition where by borrowing a small sum of blessed fortune money and returning it with interest within a year a temple's deity may intervene in the recipient's life bringing them unearned good luck and good fortune. Comprising an in-depth ethnography based on a decade of research the book explores Taiwan's money god tradition revealing its ritual culture and underlying beliefs thoroughly analyzed from sociological comparative historical geographic Taoist Buddhist metaphysical and philosophical contexts. Drawing on Taoist and Buddhist cosmology Chinese afterlife beliefs and a trust in the power of the gods to influence the material world the narrative explores the subjective nature of luck and fate of human desires choices and decisions and of individuals' subjective understandings of what the universe contains. These factors all contribute to the book's final question which through an exploration of human deity interactions investigates whether Jacques Derrida's true unreciprocal gift exists on a transcendent level amid the religious exchanges within Taiwan's money god tradition. This will be a valuable resource for students and scholars of Chinese religion and Taiwanese culture as well as those with an interest in East Asian philosophy and religion *Humans and Generative AI Tools for Collaborative Intelligence* Zhao, Jingyuan, Kumar, V. Vinoth, Katina, Polinapilinho F., Richards, Joseph, 2025-06-11 The relationship between humans and generative AI tools creates a new era of collaborative intelligence where human creativity critical thinking and empathy merge with the speed scale and precision of artificial intelligence. Rather than replacing human roles generative AI systems help with problem solving ideation and decision making across diverse fields such as education healthcare design and business. This enables individuals and organizations to reveal deeper insights accelerate innovation and tackle complex challenges with enhanced efficiency. As these technologies advance the focus is shifting toward fostering ethical inclusive and human centered collaborations that amplify collective intelligence rather than diminish it. *Humans and Generative AI Tools for Collaborative Intelligence* explores recent advancements in collaborative intelligence of humans and generative AI tools with a focus on state of the art approaches methodologies and systems for the design development deployment and innovative use of those technologies and applications to advance industries and organizations. It develops guidelines to help industries and organizations achieve the collaborative intelligence of humans and generative AI tools and put the power of collaborative intelligence to work. This book covers topics such as digital technology robotics and deep learning models and is a useful resource for business owners computer engineers academicians researchers and data scientists *Artificial Intelligence for Urban Planning* Thomas W. Sanchez, 2025-09-22 This book aims to introduce planners to AI outlining essential concepts terminologies and methodologies. AI now promises to reshape urban planning but as with many technological innovations AI also introduces ethical practical and organizational challenges. Understanding both AI's current capabilities and its limitations is essential for planners even as we acknowledge the rapid and unpredictable nature of its evolution. Chapters address some of these complexities not by providing definitive

answers but by introducing urban planners to core AI topics The book shows how planners can effectively use AI in their daily practices engage constructively with technical specialists and critically assess the appropriateness of these technologies in different planning contexts This book will be of interest to both urban planning professionals and researchers **AI**
