Journal of American Indian Education, 2012

Rethinking Multicultural Education Carol Korn-Bursztyn, Alberto M. Bursztyn Ph.D., 2002-03-30 Korn and Bursztyn and their contributors examine the cultural transitions that children make as they move between the cultures of home and school To better understand these transitions they explore how educators understand their students shifting experiences and examine how educators also negotiate transitions as they too move from home to school each day The narratives or case studies reflect this shifting gaze from child to teacher to parents and take up the various relational configurations that these can form amongst and between each other They turn a critical eye toward instances of classroom practice and school life connecting personal knowledge with school change In some cases the authors draw directly on autobiographical material linking these to a reflective approach to teaching Avoiding the celebratory tone that often attends discussions of multiculturalism the authors address how diversity engages us in continual renegotiation of the personal and social The perspectives of educators and of teacher candidates are presented and the construction of cultural identity and its impact on schools explored In illuminating the complicated nature of cultural transitions and the obligation of schools to create places in which children and families of diverse backgrounds can thrive they highlight how multiculturalism can play a transformative role in the lives of children and schools A must reading for educators and graduate students in education school psychology guidance and counseling

Critical Multiculturalism Stephen May, 1999 This text aims to bring together two movements of multiculturalism and anti racism which have previously been distant from each other

White Myopia in Education Carol R. Baker, 2010

Interrogating Whiteness and Relinquishing Power Nicole M. Joseph, Chayla

Haynes, Floyd Cobb, 2016 *Interrogating Whiteness and Relinquishing Power* White Faculty's Commitment to Racial Consciousness in STEM Classrooms is a collection of narratives that will transform the teaching of any faculty member who teaches in the STEM system. The book links issues of inclusion to teacher excellence at all grade levels by illuminating the critical influence that racial consciousness has on the behaviors of White faculty in the classroom. It functions as an analytical tool scaffolding exemplary examples to inspire readers to engage in the complex and difficult work of assessing their own racial consciousness and teacher effectiveness. White pre-service teachers in STEM education rarely see the importance of the link between race and the teaching and learning of mathematics in part because the White faculty who are teaching these subjects rarely engage in the study of racial projects in STEM. From this perspective, the authors of this book contend that the classroom is a racialized environment that if not addressed can reproduce racial structures and hierarchies in cyclical ways.

Rethinking Multicultural Education for the Next Generation Nadine Dolby, 2012-04-23 *Rethinking Multicultural Education for the Next Generation* builds on the legacy of social justice multicultural education while recognizing the considerable challenges of reaching today's college students. By drawing on breakthrough research in two fields, neuroscience and animal studies, Nadine Dolby argues that empathy is an underlying element of all living beings. Dolby shows how this commonality can provide a scaffolding for building an exciting new approach to developing multicultural and global consciousness, one that has the potential to transform how our students see and relate to the world around them. This book features classroom vignettes and reflections, discussion of research with pre-service teachers on the concept of empathy and pedagogical suggestions for fostering the new empathy in students. Incorporating discussions of animal emotions, sustainability, and our responsibilities to all living creatures and the planet, Dolby challenges multicultural educators to rethink both curriculum and pedagogy and to begin new and bolder conversations about how empathy for humans, animals, and the planet must be part of a new approach to teaching.
