Evaluating the Effectiveness of Terrorism Risk Financing Solutions Howard Kunreuther, Erwann Michel-Kerjan, 2007 The 9 11 attacks in the United States as well as other attacks in different parts of the world raise important questions related to the economic impact of terrorism What are the most effective ways for a country to recover from these economic losses Who should pay for the costs of future large scale attacks To address these two questions we propose five principles to evaluate alternative programs We first discuss how a federal insurance program with mandatory coverage and a laissez faire free market approach for providing private insurance will fare relative to these principles We conclude that neither solution is likely to be feasible here in the United States given the millions of firms at risk

and the current structure of insurance regulation We then evaluate how well the U S Terrorism Risk Insurance Act TRIA a public private program to cover commercial enterprises against foreign terrorism on U S soil meets the five principles In particular we show that TRIA has had a positive effect on availability of terrorism coverage and also has significantly contributed to reducing insurance premiums TRIA is scheduled to terminate at the end of the year but pending legislation would extend the program for fifteen years after December 31 HR 2761 In this paper we show that such a long term extension might have important impacts on the market This could increase the take up rate as prices might be even lower than they are today We show also however that if TRIA were extended for a long period of time in its current form some insurers could game the program by collecting ex ante a large amount of premiums for terrorism insurance while being financially responsible for only a small portion of the claims ex post The general taxpayer and the general commercial policyholder whether or not covered against terrorism would absorb the residual insured losses This raises major equity issues inherent in the design of the program
