John Barell wonders if the attacks speak to a greater societal problem of complacency. He believes many students have become too passive in their learning, accepting information and facts as presented in textbooks, classes, and the media. Drawing on anecdotes from educators and his own life, Barell describes practical strategies to spur students' ability and willingness to pose and answer their own questions. Antarctica expeditions, outer space discoveries, dinosaur fossils, literature, and more help define the importance of developing an inquisitive mind using such practices as maintaining journals on field trips, using questioning frames, and models when reading texts.

Engaging in critical thinking and problem based learning and Integrating inquiry into curriculum development and the classroom culture To become habits of mind students daily curiosities must be nurtured and supported Barell draws a vivid map to guide readers to an intelligent revolution in which schools can become places where educators and students imagine and work together to become active citizens in their society Note This product listing is for the Adobe Acrobat PDF version of the book *Rocks and Minerals* Anna Claybourne,2001 Show Me Rocks and Minerals Patricia Wooster,2014 Defines through text and photos core terms related to rocks and minerals **The Mining Directory - Mines and Mining Equipment Companies Worldwide** ,2002 **The American Biology Teacher** ,2006 *Rocks and Minerals* Frederick D.
