### Safety Officer Interview Questions

Safety officers inspect facilities, processes and people to ensure they follow occupational safety guidelines (OSH). They can be found in corporations, public institutions or regulatory agencies wherever safety is a priority.

Safety officers may hold degrees in safety management or other fields. It's best to pursue those candidates who possess official certification. Ask questions about legislation and your specific industry. For example, they need to know about EPA guidelines and gas cutting if they have to inspect a construction site.

Attention to detail is critical for this job. Their commitment to OSH rules should be evident when they talk about their past experiences. Confidence and communication skills will help them enforce the law in cases where others tend to disregard it.

### Operational and Situational questions

- How would you go about conducting a workplace safety audit?
- What is job safety analysis (JSA)? Can you walk me through the process?
- What are some things you would do to implement a Hazard Communication Program?
- If you saw that some employees weren't using protective equipment, what would you do?
- You want to make improvements in workplace safety conditions, but one of the managers opposes it saying it's expensive and unnecessary. How would you approach the subject?

### Role-specific questions

- What is [e.g. gas cutting] and what dangers does it involve?
- What are some safety precautions for scaffolding?
- What do you know about EPA guidelines in [specific industry]?
- What will be your priorities during your first week?
- How do you compute noise exposure?
- What is your experience in writing reports?
