Samsung Electronics Case Study:

Samsung Electronics and the Struggle for Leadership of the Electronics Industry Anthony Michell, 2011-09-29

This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

Samsung Electronics Tony Michell, 2010-06-28 This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

Case Study of Samsung's Mobile Phone Business Boon-Young Lee, Seung-Joo Lee, 2004

Global Business Strategy: Asian Perspective (Second Edition) Hwy-chang Moon, 2022-01-07 As the second edition of Global Business Strategy, this book provides novel insights on how a firm can formulate a successful approach toward its global business from both the Western and Asian perspectives. In this respect, the book's overall goal is to bridge the gap between these two different viewpoints. This second edition includes more recent business theories, techniques, and cases within the field of global business strategy. Specifically, it includes new theories and techniques like creating shared value (CSV), the global value chain platform strategy, and business ecosystem. They are shown to be important tools for enhancing competitiveness and maintaining sustainability among firms in today's rapidly changing international business environment. This is very much evident today given the critical challenges arising from the trade tensions between the United States and China, emerging technologies such as artificial intelligence and digital transformation, and the unprecedented disruptions brought on by the coronavirus pandemic. We hope that this book will serve as a useful companion for students, business practitioners, policymakers, and the more general readers interested in issues related to competitiveness and business.

Market Entry Strategies Mario Glowik, 2020-09-21 This entirely revised and updated third edition of Market Entry Strategies continues to combine the profound explanation of internationalization theories and concepts with real-life firm cases. Reviewing the readers' valuable feedback from successful previous editions, this version targets to improve the readability. New firm cases of Delivery Hero and Tesla contribute to broaden the book's industry focus. Particular attention is paid on the case studies developed to exercise in light of business practice, what is theoretically taught and explained in the textbook. Through its link to digital learning tools such as charts available to the public at YouTube, this new edition provides best pre-requisites for distance learning environments.

Sony vs Samsung Sea-Jin

Chang, 2011-02-25 Sony vs Samsung is business history at its best. It explores the divergent fortunes of these two electronics giants in the last decade and identifies the true reasons behind Sony's decline and Samsung's rise. Contrary to popular belief, Chang shows that success or failure does not simply arise from different strategies. Rather, it emerges from major decisions that are deeply rooted in the companies' organizational processes and their executives' political behavior. This book is a must read for any senior executive. Constantinou Markides, Robert P. Bauman, Professor of Strategic Leadership and Chairman, Strategy Department, London Business School. Sea Jin Chang has produced that rarity in a business book, one that is as valuable to practicing managers as it is insightful to academic researchers. In this fascinating comparison of two modern global giants, he applies his high-resolution research microscope to their changing fortunes by dissecting their contrasting strategies and providing interesting insights into their divergent organizational processes and management practices. This is a very valuable contribution to the international business literature. It will end up in as many corporate boardrooms as faculty seminars. Christopher A. Bartlett, Thomas D. Casserly, Professor Emeritus, Harvard Business School. Sea Jin Chang has written a fascinating comparison of Sony and Samsung that will be valuable to anyone interested in strategy, organizations, or international business. The interwoven and very detailed case studies of two very different companies in overlapping industries illuminate problems such as adaptation to technological change, analog to digital, organizational flexibility, and globalization. His attempt to analyze both strategic development and implementation is successful and very useful. Both academics and practitioners will learn a lot from this book. Stephen J. Kobrin, William Wurster, Professor of Multinational Management, The Wharton School, University of Pennsylvania. Refreshingly original and entertaining, this book analyzes major strategic decisions of Samsung and Sony and highlights organizational processes and top management leadership that have shaped their performances. This is a must read for all executives who want to understand the strengths and weaknesses of Asian competitors. It also provides penetrating insights to other Asian companies with global ambitions. Myoung Woo Lee, President and CEO, Irivier. **Innovation and Industrialization in Asia**, Rajah Rasiah, Yeo Lin, Yuri Sadoi, 2013-09-13.

Existing accounts of East Asia's meteoric growth and structural change have either been explained as one dictated essentially by markets with strong macroeconomic fundamentals or a consequence of proactive governments. This book departs from such a dichotomy by examining inductively the drivers of the experiences. Given the evolutionary treatment of each economic good and service as different, this book examines technological catch-up with a strong focus on the industries contributing significantly to the economic growth of the countries selected in Asia. The evidence produced supports the evolutionary logic of macro, meso, and micro interactions between several institutions depending on the actors involved, structural location, and typology of taxonomies and trajectories. The book carefully picks out experiences from the populous economies of China, India, and Indonesia; the high-income economies of Korea and Taiwan; the middle-income economies of Malaysia and Thailand; and the transitional, least developed country of Myanmar. Chapters 1-7 of this book were originally published as a special issue of
