Bouras, 2020-11-19 This book constitutes the refereed post conference proceedings of the 17th IFIP WG 5.1 International Conference on Product Lifecycle Management PLM 2020 held in Rapperswil Switzerland in July 2020. The conference was held virtually due to the COVID 19 crisis. The 60 revised full papers presented together with 2 technical industrial papers were carefully reviewed and selected from 80 submissions. The papers are organized in the following topical sections: smart factory, digital twins, Internet of Things, IoT, IIoT, analytics in the order fulfillment process, ontologies for interoperability, tools to support early design phases, new product development, business models, circular economy, maturity implementation and adoption, model based systems engineering, artificial intelligence in CAx, MBE and PLM, building information modelling and industrial technical contributions.

Artificial Intelligence in Management Jana M. Würtele, 2025-01-31 In an era of constant global change, companies are challenged to adapt quickly to evolving consumer demands and technological innovations. However, the complexity of product changes in the medical technology industry is particularly high. Leveraging expertise of interview partners from Germany, Switzerland, Liechtenstein, and India, this book examines the perception of digital transformation within the medical technology industry and the increasing prominence of artificial intelligence as a transformative force. Thus, it provides a critical analysis of the potential opportunities for optimization and risks of integrating this technology into product change management in this sector, offering a comprehensive perspective for management practice.
