The Global City Saskia Sassen, 2002 In her classic book *The Global City* Saskia Sassen tells how New York London and Tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes The book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future

Global Networks, Linked Cities Saskia Sassen, 2016 In her pioneering book *The Global City* Saskia Sassen argued that certain cities in the postindustrial world have become central nodes in the new service economy strategic sites for the acceleration of capital and information flows as well as spaces of increasing socio economic polarization One effect has been that such cities have gained in importance and power relative to nation states In this new collection of essays Sassen and a distinguished group of contributors expand on the author's earlier work in a number of important ways focusing on two key issues First they look at how information flows have bound global cities together in networks creating a global city web whose constituent cities become global through the networks they participate in Second they investigate emerging global cities in the developing world Sao Paulo Shanghai Hong Kong Mexico City Beirut the Dubai Iran corridor and Buenos Aires They show how these globalizing zones are not only replicating many features of the top tier of global cities but are also generating new socio economic patterns as well These new patterns of development promise to lead to significant changes in the structure of the global economy as more and more cities worldwide are integrated into globalization's circuitry Includes contributions from Linda Garcia Patrice Riemens Geert Lovink Peter Taylor David Smith Michael Timberlake Stephen Graham Sueli Schiffer Ramos Christoff Parnreiter Felicity Gu David Meyer Pablo Ciccolella Iliana Mignaqui Eric Huybrechts Ali Parsa Also includes six maps

Sociology of Globalization Saskia Sassen, 2007 In her groundbreaking book sociologist Saskia Sassen identifies two sets of processes that make up globalization One is the set of global institutions such as the World Trade Organization global financial markets the War Crimes Tribunals and the new global cosmopolitanism However there is a second set of processes frequently ignored by most social scientists that occur on the national and local level These processes can include state monetary and fiscal policy networks of activists engaged in local struggles that have an explicit or implicit global agenda and local and national politics that are unknowingly part of global networks containing similar localized efforts Sassen's new book focuses on the importance of place scale and the meaning of the national to study globalization By emphasizing the interplay between the global and the local A Sociology of Globalization

Territory, Authority, Rights Saskia Sassen, 2008-07-01 Where does the nation state end and globalization begin In *Territory Authority Rights* one of the world's leading authorities on globalization shows how the national state made today's global era possible Saskia Sassen argues that even while globalization is best understood as denationalization it continues to be shaped channeled and enabled by institutions and networks originally developed with nations in mind such as the rule of law and respect for private authority This process of state making produced some of the capabilities enabling the global era The difference is that these capabilities have become part of new organizing logics actors other than nation states deploy them for new purposes Sassen builds her case by examining how three components of any society in any age territory authority and rights have changed in themselves and in their interrelationships across three major historical assemblages the medieval the national and the global The book consists of three parts The first *Assembling the National* traces the emergence of territoriality in the Middle Ages and considers monarchical divinity as a precursor to sovereign secular authority The second part *Disassembling the National* analyzes

economic legal technological and political conditions and projects that are shaping new organizing logics The third part Assemblages of a Global Digital Age examines particular intersections of the new digital technologies with territory authority and rights Sweeping in scope rich in detail and highly readable Territory Authority Rights is a definitive new statement on globalization that will resonate throughout the social sciences Globalization and Intellectual Property Alexandra George,2017-05-15 Intellectual property laws have become intricately entwined with discussions about globalization This volume deals with the politics economics and effects of global intellectual propertization It provides essays covering key issues including the international relations of global intellectual propertization the TRIPS Agreement and the tying of intellectual property issues to international trade negotiations contentions that global intellectual propertization is a form of post colonial neo imperialism globalization s effects on intellectual property law s classic doctrines and rationales and the cultural effects of global intellectual propertization Hamburg, a global city? A case study on Hamburg's producer services and cultural industries Anna-Lena Prüser,2018-11-15 Bachelor Thesis from the year 2015 in the subject Geography Earth Science Economic Geography grade 1 3 University of Twente language English abstract This bachelor thesis examines a city s interlinkage in the globalizing processes and aims at answering the research question To what extent can Hamburg be qualified as a Global City in terms of its localization of global producer services and cultural industries Global cities are defined as local nodes of the corporate service sector and the cultural economy which are associated in a global network Following this an in depth analysis of Hamburg s performance on the economic and cultural dimension will be provided in order to clarify its global city status It will be innovative in two respects Firstly it will provide an incorporation of both dimensions economic and culture into its analysis in order to provide a more comprehensive and less biased estimate of a metropolis global city status a practice that has not been conducted in the literature so far Secondly it will apply this dualistic approach to the city of Hamburg Even though it is the second largest city in Germany according to population numbers Hamburg has not yet been subject of detailed investigation by global city researcher In a SWOT analysis the strength weaknesses opportunities and threats of the producer service sector and the cultural economy are outlined in order to determine their basic situation the sectors integration in the global networks are discussed mainly on basis of the Globalization and World Cities Studies Research Network GaWC dataset and the data generated by Kratke 2010 By linking the local conditions with the global perspective on both sectors the not fully developed functional status of Hamburg as a global city becomes clear it is a global city in the second row Derived from this finding recommendations for a better involvement in the global networks are provided Governing Climate Change Jolene Lin,2018-06-21 First systematic study of global cities as lawmakers in the world of transnational climate change governance American Studies Janice A. Radway, Kevin Gaines, Barry Shank, Penny Von Eschen,2009-03-09 American Studies is a vigorous bold account of the changes in the field of American Studies over the last thirty five years Through this set of carefully selected key essays by an editorial

board of expert scholars the book demonstrates how changes in the field have produced new genealogies that tell different histories of both America and the study of America Charts the evolution of American Studies from the end of World War II to the present day by showcasing the best scholarship in this field An introductory essay by the distinguished editorial board highlights developments in the field and places each essay in its historical and theoretical context Explores topics such as American politics history culture race gender and working life Shows how changing perspectives have enabled older concepts to emerge in a different context

Spatial Turns Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies

The Century of Global Cities Andrea Tobia Zevi, 2020-01-12 Cities are gaining importance and influence worldwide They sustain the global economy set cultural trends produce greenhouse gas emissions and consume energy they attract migration flows and foster new political waves While cities were supposed to be declining back in the 1980s the globalised economy has established them as crucial world hubs leading billions of people on every continent both at the top and the bottom of the social ladder to move to cities Today global cities cry out for a more prominent role But why and to what extent do they matter Can they really stand alone in the global arena How are they interacting with governments and multilateral organisations From climate change to connectivity from inequalities to migration what is their contribution to key global challenges

Local Places in the Age of the Global City Roger Keil, Gerda R. Wekerle, David V. J. Bell, 1996 The ugly grey heap of cement and asphalt that makes up much of the urban sprawl is something most of us wish would just go away And yet more than half the world's population will live in urban centres by the turn of the millennium and most will be exposed to degraded urban environments The contributors to Local Places look at the complex social economic and political contexts of cities in the 1990s and suggest that cities and urbanity while part of the problem also need to be considered as part of the solution This volume brings together clear and critical analyses and practical proposals that bring us closer to that reality A primer for urban ecologists who seek to sustain the

local places but in the larger political context Local Places provides planners community activists students and the general reader with a cross section of current debates and proposals surrounding urban sustainability Gangs in the Global City
