**Physics- and Engineering Knowledge-based Geometry Repair System for Robust Parametric CAD Geometrics** Dong Li,2012 *Physics- and Engineering Knowledge-based Geometry Repair System for Robust Parametric CAD Geometrics* Dong Li,2012 In modern multi objective design optimisation an effective geometry engine is becoming an essential tool and its performance has a significant impact on the entire process Building a parametric geometry requires difficult compromises between the conflicting goals of robustness and flexibility The work presents a solution for improving the robustness of parametric geometry models by capturing and modelling relative engineering knowledge into a surrogate model and deploying it automatically for the search of a more robust design alternative while keeping the original design intent Design engineers are given the opportunity to choose from a list of optimised designs to balance the robustness of the geometry and the original design intent The prototype system is firstly tested on a 2D intake design repair example and shows the potential to reduce the reliance on human design experts in the conceptual design phase and improve the stability of the optimisation cycle It also helps speed up the design process by reducing the time and computational power that could be wasted on flawed geometries or frequent human interferences A case study of the proposed repair system based on the design and analysis of a three dimensional parametric turbine blade model has been set up An automatic analysis workflow is set up and the results are summarised for setting up a repair database based on surrogate training methods Positive repair results have been achieved and an automatic repair cycle for the blade model is being set up and tested The proposed physics and engineering knowledge based geometry repair system for robust parametric geometries proves an effective tool for ensuring automation robustness and design flexibility Hybrid Geometry Representations with Applications in Medical Imaging and Model Repair Stephan Michael Bischoff,2007
