**Between Two Worlds** John Carriero, 2009 Between Two Worlds is an authoritative commentary on and powerful reinterpretation of the founding work of modern philosophy Descartes's Meditations Philosophers have tended to read Descartes's seminal work in an occasional way examining its treatment of individual topics while ignoring other parts of the text In contrast John Carriero provides a sustained systematic reading of the whole text giving a detailed account of the positions against which Descartes was reacting and revealing anew the unity meaning and originality of the Meditations Carriero finds in the Meditations a nearly continuous argument against Thomistic Aristotelian ways of thinking about cognition and shows more clearly than ever before how Descartes bridged the old world of scholasticism and the new one of mechanistic naturalism Rather than casting Descartes's project primarily in terms of skepticism knowledge and certainty Carriero focuses on fundamental disagreements between Descartes and the scholastics over the nature of understanding the relation between the senses and the intellect the nature of the human being and how and to what extent God is cognized by human beings Against this background Carriero shows Descartes developed his own conceptions of mind body and the relation between them creating a coherent philosophically rich project in the Meditations and setting the agenda for a century of rationalist metaphysics

Laboratory Epistemologies Jenny Boulboulle, 2024-10-11 In Laboratory Epistemologies A Hands On Perspective Jenny Boulboulle examines the significance of hands on experiences in contemporary life sciences laboratories Addressing the relationship between contemplation and manipulation in epistemology Boulboulle combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue dure study of the history and philosophy of science She radically rereads Descartes's key epistemological text Meditations on First Philosophy reframing the philosopher as a hands on knowledge maker With this reading Boulboulle subverts the pervasive modern

conception of the disembodied knower and puts the hands on experimenter at the heart of life sciences research In so doing she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today's techno scientific spaces By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands on practitioner Boulboul offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices

**Subject to Reading** Eugene Henry De Klerk, 2009 The book explores what it means for a human organism to be a subject and responds to what it sees as the contemporary ablation of subjectivity in favour of an impoverished biopolitics a concept borrowed from Foucault It is preoccupied with questions of ethics and education arguing that Lacanian psychoanalysis like Freirean literacy constitutes

first and foremost an education in responsible subjecthood It identifies such an education as a very necessary intervention in what appears to be a global double bind between fanatical certainty and capitalist abstraction The book asserts that contrary to most trends concerning the appropriation of psychoanalysis or Freirean techniques for teaching Freirean pedagogy and Lacanian psychoanalysis are not purely oetoolboxes but profound epistemological and philosophical arguments These arguments also combine to suggest a new socio political conception of theology In addition the book draws on examples from literature and popular culture to explicate certain ideas In this regard the book primarily undertakes a reading of selected works by J M Coetzee      *Proceedings and Addresses of the American Philosophical Association* American Philosophical Association,2003 List of members in v 1      **Believing in Nothing and Something** Geoff Heath,2003      Berkshire Encyclopedia of World History ,2005 A comprehensive encyclopedia of world history with 538 articles that trace the development of human history with a focus on area studies global history anthropology geography science arts literature economics women s studies African American studies and cultural studies related to all regions of the world Provided by publisher
