

# GEOTECHNICAL ENGINEERING REPORT

## 1.0 INTRODUCTION

This geotechnical engineering report has been completed for the proposed Public Safety Building and Elderly Duplex Buildings to be constructed in Wyandotte, Oklahoma. A total of nine borings, designated B-1 through B-9, were performed to depths of approximately 3 to 15 feet below the existing ground surface. Logs of the borings along with a site location map and boring location plans are included in Appendix A of this report.

The purpose of these services is to provide information and geotechnical engineering recommendations relative to:

- subsurface soil and rock conditions
- groundwater conditions
- earthwork
- floor slab subgrade preparation
- foundation design and construction
- pavement design and construction

## **Sample Progress Report About Engineering:**

*Writing Like An Engineer* Dorothy A. Winsor, 2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes
