

SAP HR - Personnel Administration

SAP HR - Personnel administration consists of many individual pieces of information, which are stored, updated and managed for each employee in HR system.

To manage personnel data related to tasks in HR system, you need Personnel Administration. There are various Infotypes that can be used for Personnel Administration.

Commonly used Personnel Administration Infotypes are -

- Organization Management Infotypes
- Time Management Infotypes
- Recruitment Infotypes

Organization Structure

Organizational structures is used in HR to plan and map the organizational levels of an organization to control and simplify processes such as time recording and payroll. Typical components in an organizational structures include -

- Enterprise structure
- Pay scale structure
- Wage types
- Personnel structure
- User authorizations

In Organization hierarchy, you define the subdivision of company into personnel areas, sub areas, company code, etc. Using different grouping, you can create organizational hierarchies and control functions. Using grouping, you can set up enterprise and personnel structure that are independent of each other.

By assigning an employee to personnel and enterprise structure, you can easily process human resource data of an employee. By using the default values, it is easy to manage data for different fields.

To evaluate human resource data, you can use the Organizational structures for creating evaluations and analyses of employee data for Controlling and departments.
