**GEOGRAPHY APPLICATION: MOVEMENT**

***British Population Moves to the Cities***

*Directions: Read the paragraphs below and study the maps and graph carefully. Then answer the questions that follow.*

Britain's richest coal fields are in the central and northern regions of the country. This geographic fact caused a major shift in Britain's population between 1750 and 1850.

Coal was found to be the most efficient way to power the new steam engine. As a result, many new industries and factories moved to be near the sources of energy. Soon, coal-fired steam engines

powered the iron foundries, textile factories, and railroads of northern Britain.

Industrialization also required a large labor force. The enclosure movement, in which wealthy landowners bought out small farms and forced these people out of their livelihood, provided a ready supply of workers. As a result, masses of people moved to the industrial cities to find jobs.
