Chapter 7 Economic Growth And International Trade:

A Theory of International Trade Wei-Bin Zhang, 2012-12-06 Over more than two centuries the development of economic theory has created a wide array of different concepts theories and insights My recent book Capital and Knowledge Zhang 1999a shows how separate economic theories such as the Marxian economics the Keynesian economics the general equilibrium theory and the neoclassical growth theory can be examined within a single theoretical framework The Capital and Knowledge constructs an economic theory to account for the phenomena explained by the main economic theories of national economies in a unified manner It tries to draw together the disparate branches of economics into a single organized system of knowledge This book is a part of my economic theory with endogenous population capital knowledge preferences sexual division of labor and consumption institutions economic structures and exchange values over time and space Zhang 1996a As an extension of the Capital and Knowledge which is focused on the dynamics of national economies this book is to construct a theory of international trade We are concerned with dynamic relations between international division of labor division of consumption and determination of prices structure in global economy We examine dynamic interdependence between capital accumulation knowledge creation and utilization economic growth price structures and international trade patterns under free competition Our theory is constructed on the basis of a few concepts within a compact framework

The Impact of International Trade and FDI on Economic Growth and Technological Change

Patricia Hofmann, 2013-03-14 Economic globalisation and technological change are the two issues that concerned people in the past concern them today and will concern them in the future all over the world poor or rich Traditionally questions about allocative effects are asked What are the labour market implications Who loses Who wins What is the net aggregate welfare effect after an adjustment period However two points are rarely taken into consideration How do globalisation and technological change interact and what are the potential long run implications for economic growth This book addresses the interplay of these megatrends It asks how economic globalisation may affect innovation and technology of individual firms and eventually the growth prospects of countries Thereby it shows that protectionism not only harms static efficiency but might as well lead to dynamic losses The book provides a systematic overview of the theoretical underpinnings of the openness growth nexus and summarises the conceptual problems and important findings of the empirical analyses so far The theoretical insights are supported by two empirical studies the first dealing with the innovative behaviour and the within multinational technology transfer of Spanish firms that were acquired by foreign companies and the second analysing productivity growth rate implications from exporting for German manufacturing firms
