**Surfacing Brilliance Through Meaningful Science Assessment** Aneesha Badrinarayan, 2025-08-18 Science education is evolving and our assessments should too. The Next Generation Science Standards and similar standards based on A Framework for K-12 Science Education ushered in a bold vision focused on figuring out phenomena and problems sensemaking that mirrors how scientists work and real world relevance. Although instruction has started to shift, assessment has too often lagged behind, failing to capture or support the depth, complexity, and creativity of meaningful science learning. *Surfacing Brilliance Through Meaningful Science Assessment: Shifting Practice to Reflect Today's Students and Today's Standards* is the essential guide for educators and leaders ready to rethink how we understand, evaluate, and support K-12 science learning. Written by Aneesha Badrinarayan, a leading voice in science education and assessment, this book offers a clear roadmap for designing assessments that surface the brilliance of young people in ways that are meaningful, equitable, and grounded in the lived realities of today's classrooms. Drawing on four core priorities: sensemaking, relevance, assets, and opportunity, this book empowers educators to move beyond traditional tests to create assessments that reveal what students truly understand and can do. Bridging cutting-edge research and practical implementation, this book offers concrete strategies for using phenomena, problematizing strategies, and purposeful prompts to drive authentic sensemaking. Frameworks and tools to develop relevant asset-based assessments that reflect students' strengths and experiences and are specific to a given classroom context. Approaches to using data for targeted feedback and deeper learning. A forward-looking chapter on how to meaningfully integrate AI into science assessment in an age of rapidly evolving technology. Whether you're a K-12 teacher, instructional leader, or assessment designer, *Surfacing Brilliance Through Meaningful Science Assessment* will transform how you think about using assessment to understand, evaluate, and support student learning. This guide ensures that educators and leaders assess students in ways that center student brilliance, embrace innovation, and inspire learners to achieve ambitious learning goals in science.

**Biology: How Life Works (Volume 1)** James Morris, 2013-01-04 Ordinarily, textbooks are developed by first writing chapters, then making decisions about art and images, and finally, once the book is complete, assembling a test bank and ancillary media. This process dramatically limits the integration across resources and reduces art, media, and assessments to ancillary material rather than essential resources for student learning. *Biology: How Life Works* is the first project to develop three pillars: the text, the visual program, and the assessment, all at the same time. All three pillars were developed in parallel to make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration. These three pillars are all tied to the same set of core concepts, share a common language, and use the same visual palette. In this way, the
