Lasby, 1997 Previous Eisenhower biographers have touched on his heart condition but Clarence Lasby is the first to examine the impact of the president's health on the nation He offers a dramatic revisionist account of the events surrounding the president's 1955 heart attack and subsequent efforts by the president and his staff to minimize its political impact Drawing on newly opened medical records and personal papers of Eisenhower's physicians Lasby challenges virtually everything we have believed about the president's heart attack Most disturbingly he has discovered that the president's personal physician Dr Howard Snyder misdiagnosed the attack as a gastrointestinal problem and waited ten hours before sending Eisenhower to the hospital Lasby also sets the record straight on how the president and his aides managed the public's understanding of events and he offers evidence that Eisenhower Dr Snyder and press secretary James Hagerty withheld and recast information to serve the president's political priorities Equally important Lasby's book offers a touching portrait of a proud man faced with a debilitating disease It examines Ike's private struggle to lead a full life despite his condition and analyzes his decision to seek a second term even against the advice of cardiologist Paul Dudley White It also shows how a man who had always carefully joked after his health now became obsessed with it      *Health Psychology* Linda Brannon, Jess Feist, 2004 Backed by a strong and current research base Brannon and Feist's proven book offers balanced coverage of the cognitive behavioral and biological approaches to health psychology Adopters praise its even handed discussions of research and applications as well as the equal emphasis given to illness and prevention Integrated coverage of physiology including immunity pain and stress rounds out the text The authors include many innovative learning tools in every chapter to encourage active participation giving students the strategies and tools for behavior modification and critical thinking      **Textbook of Pharmacology** W.
