 Edition      Lead Generation Jörg Holenz,2016-03-16 In this comprehensive two volume resource on the topic senior lead  
 generation medicinal chemists present a coherent view of the current methods and strategies in industrial and academic lead  
 generation This is the first book to combine both standard and innovative approaches in comparable breadth and depth  
 including several recent successful lead generation case studies published here for the first time Beginning with a general  
 discussion of the underlying principles and strategies individual lead generation approaches are described in detail  
 highlighting their strengths and weaknesses along with all relevant bordering disciplines like e g target identification and  
 validation predictive methods molecular recognition or lead quality matrices Novel lead generation approaches for  
 challenging targets like DNA encoded library screening or chemical biology approaches are treated here side by side with  
 established methods as high throughput and affinity screening knowledge or fragment based lead generation and  
 collaborative approaches Within the entire book a very strong focus is given to highlight the application of the presented  
 methods so that the reader will be able to learn from real life examples The final part of the book presents several lead  
 generation case studies taken from different therapeutic fields including diabetes cardiovascular and respiratory diseases  
 neuroscience infection and tropical diseases The result is a prime knowledge resource for medicinal chemists and for every
