International Market Entry Strategies of Multinational Enterprises (MNEs) in Emerging Markets Nikolina Saric, 2014-10-10 Master s Thesis from the year 2014 in the subject Business economics Business Management Corporate Governance grade 1 University of Vienna language English abstract Multinational enterprises MNEs are becoming increasingly present on the global market Since their products and services are offered globally their multinational strategies must be adapted to different cultures environments of target countries and their internal strengths Since the market in the 21st century is oversaturated it is no wonder that more and more MNEs are targeting emerging markets for multiple business opportunities Since markets are very dynamic entry strategies chosen by MNEs must be up to date with market changes Although MNEs are present in the global market and well acquainted with its dynamics entry into certain countries is not always an easy task The main concern of this thesis is to evaluate international entry strategies of companies operating in fast moving consumer goods FMCG industries in China and India Additionally the

thesis aims in exploring and evaluating the consistency of the market entry strategies performed by one specific company P G and two different theoretical frameworks namely Resource Based Theory by Grant 1991 and Eclectic paradigm OLI by Dunning 2000 For the purposes of this thesis I concentrate on one of the largest and best known MNEs delivering widely known consumer goods namely Procter and Gamble P G My interest lies in exploring whether P G s market entries in two target markets can be compared to above mentioned theories If not the goal is to understand inconsistencies and factors which influence them Emerging markets have a very unique nature which could be a challenge even for the most successful MNEs like P G Therefore understanding these could be a very complex but unavoidable process in order to achieve long term winning strategy
