Smart Cities give Subjects Sina Kiene,2021-04-29 Bachelor Thesis from the year 2020 in the subject Computer Sciences  
 Artificial Intelligence grade 1 3 University of Applied Sciences Hamburg language English abstract This bachelor thesis is  
 based on the approach of providing nowadays society with solutions through the advancement of Artificial Intelligence in  
 order to improve their quality of life For the reason that the obstacles within the health sector are evolving in a negative  
 sense a special focus within this concept is laid on Artificial Intelligence systems impact within the health sector of mental  
 illnesses Thus being said the structure of the thesis focuses on four key theories in the beginning which arise over and over  
 within the thesis These four key theories included The Wave Approach by Toeffler the definition of three identities  
 Neuroscience and Mental Illnesses burn out depression and anxiety Nevertheless the thesis was examined in several other  
 parts such as Artificial Intelligence and the technology behind it the implementation of AI in smart cities pattern recognition  
 and monitoring in the health sector By focusing on such areas analysing and connecting them with past approaches the  
 impact of the data was described and analysed Thus being said the thesis approach was coming to the conclusion that

 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English  
 abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This  
 study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical  
 study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing  
 world digital transformation has become an evitable process for companies to adapt to new technologies and market trends  
 The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively  
 On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work  
 However on the other hand it pointed out Germany s weaknesses in digital infrastructures and cybersecurity Additionally

many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic However there aren t any specific regulations regarding remote work in Germany yet In general remote work provides workers e g more freedom and a better work life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co workers less productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything s going remotely companies have become an easier target of cyber attacks
