How AI Thinks Nigel Toon, 2024-02-08 THE 2 TIMES

BESTSELLER Artificial intelligence is going to have a massive impact on everyone's lives an accessible and sensible read that helps demystify AI Deborah Meaden entrepreneur and star of Dragon's Den Nigel Toon is a visionary leader in the field of artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are about to win big We are used to thinking of computers as being a step up from calculators very good at storing information

and maybe even at playing a logical game like chess But up to now they haven't been able to think in ways that are intuitive or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are becoming answer engines Artificial intelligence is already revolutionising sectors from education to healthcare to the creative arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation

Social Machines James Hendler, Alice M. Mulvehill, 2016-09-20 Will your next doctor be a human being or a machine Will you have a choice If you do what should you know before making it This book introduces the reader to the pitfalls and promises of artificial intelligence AI in its modern incarnation and the growing trend of systems to reach off the Web into the real world The convergence of AI social networking and modern computing is creating an historic inflection point in the partnership between human beings and machines with potentially profound impacts on the future not only of computing but of our world and species AI experts and researchers James Hendler co-originator of the Semantic Web Web 3.0 and Alice Mulvehill developer of AI based operational systems for DARPA the Air Force and NASA explore the social implications of AI systems in the context of a close examination of the technologies that make them possible The authors critically evaluate the utopian claims and dystopian counterclaims of AI prognosticators

Social Machines The Coming Collision of Artificial Intelligence Social Networking and Humanity is your richly illustrated field guide to the future of your machine mediated relationships with other human beings and with increasingly intelligent machines

What Readers Will Learn What the concept of a social machine is and how the activities of non-programmers are contributing to machine intelligence How modern artificial intelligence technologies such as Watson are evolving and how they process knowledge from both carefully produced information such as Wikipedia and journal articles and from big data collections The fundamentals of neuromorphic computing knowledge graph search and linked data as well as the basic technology concepts that underlie networking applications such as Facebook and Twitter How the change in attitudes towards cooperative work on the Web especially in the younger demographic is critical to the future of Web applications

Who This Book Is For General readers and technically engaged developers entrepreneurs and technologists interested in the threats and promises of the accelerating convergence of artificial intelligence with social networks and mobile web technologies

Digital Ecosystems: Interconnecting Advanced Networks with AI Applications Andriy Luntovskyy, Mikhailo Klymash, Igor Melnyk, Mykola Beshley, Alexander Schill, 2024-07-29. This book covers several cutting edge topics and provides a direct follow up to former publications such as *Intent based Networking and Emerging Networking* bringing together the latest network technologies and advanced AI applications. Typical subjects include 5G/6G clouds, fog, leading edge LLMs, large scale distributed environments with specific QoS requirements for IoT, robots, machine and deep learning chatbots and further AI solutions. The highly promising combination of smart applications, network infrastructure and AI represents a unique mix of real synergy. Special aspects of current importance such as energy efficiency, reliability, sustainability, security and privacy, telemedicine, e-learning and image recognition are addressed too. The book is suitable for students, professors and advanced lecturers for networking system architecture and applied AI. Moreover, it serves as a basis for research and inspiration for interested professionals looking for new challenges.

Career Services and Workforce Development Centers for Libraries Raymond Pun, Arpine Eloyan, Michael R. Oppenheim, 2024-11-18. With the rise of unemployment, increased career growth opportunities and changing workforce demographics, libraries can support job seekers in several ways. *Career Services and Workforce Development Center for Libraries: A Guide* serves as a resource for libraries interested in creating, supporting or enhancing their career services, economic and workforce development programs for their communities. Going beyond collection development and hosting job fair activities, the book covers teaching resources and interviews from library leaders supporting workforce development initiatives or collaborations, ideas on how libraries can be embedded in the workforce development community by providing a series of job readiness activities, programs and services, how academic and public librarians can support their users exploring career opportunities and development, examines employment trends and resources such as generative artificial intelligence to dive into these issues so libraries can stay active in identifying new skill development and technologies to support their communities. How can one start a career services or job center program in their libraries? What are specialized career services in libraries being offered? How can libraries advocate for funding for workforce development? Divided into five chapters, each chapter addresses these questions and provides a series of examples, ideas and resources for readers to consider replicating in their own libraries.
