social technologies and people's expectations of values besides value. As a result, leaders have to create an outstanding culture for all, no matter who they are or what they do for the organization. This groundbreaking book from the creators of the gold standard Fortune 100 Best Companies to Work For list shows how it's done. Through inspiring stories and compelling research, the authors demonstrate that great places to work for all benefit the individuals working there and contribute to a better global society even as they outperform in the stock market and grow revenue three times faster than less inclusive rivals. This is a call to lead so that organizations develop every ounce of human potential.

The Introvert's Guide to Entrepreneurship Nate Nicholson, 2015-04-15

How an Introverted Entrepreneur Accidentally Discovered the Critical Effect of His Personality on His Business. If you are an introvert wishing to start a business, I can't think of a worse way to mess it up than to completely disregard the effect of your personality on its success. In fact, that's exactly how I messed up my business. I launched a venture suited for an extrovert, not even once asking myself whether I could handle it with my deeply introverted nature. Would you like to avoid a major screw up and start a business that fits your personality? Don't reply. I know your answer. I wrote this book to help you avoid the mistakes I made and teach you the proper way to start a business as an introvert. I will share with you the lessons and observations every introverted businessperson should consider before pursuing a new venture. If you skip this step, chances are that your business will fail much sooner than you think, and the only person at fault would be you. I was there, and let me tell you, it ain't pretty. Let me help you learn how to make the most out of your strengths to start a successful introvert-friendly business. Here are just some of the things you will learn from the book:

- your 5 main strengths to help you become an entrepreneur. Just one of these strengths is more potent than any other business skill, yet you're probably not aware of it.
- Chapter 1: your 5 most harmful weaknesses that can affect your business. Learn which weaknesses can ruin your business endeavors and how to prevent it from happening. Even with the most genius business idea and perfect execution, you can fail when exhibiting one of these weaknesses.
- Chapter 2: how to lead your company as an introvert. Hint: many successful entrepreneurs, including extroverts, do something entirely different than most people. And it's introvert-friendly too.
- Chapter 3: 5 key attributes of a good business partner for an introvert. If you don't want to go it alone, learn how to choose the right partner. Just one of these traits can either make or break your partnership.
- Chapter 4: how to promote yourself and network as an introvert. Most introverts possess a powerful skill that can help them promote their business without networking the old-school extrovert-friendly way.
- Chapter 5: 5 attributes of introvert-friendly businesses. Before you launch a new venture, ask yourself how well it fits your personality. Don't leave this question for later unless you want to find yourself trapped in a business that sucks your soul.
- Chapter 6: 9 introvert-friendly business models to consider. Learn what types of ventures fit the introverted personality best and increase your chances of success.
- Chapter 6: 5 introvert-friendly ways to come up with business ideas. If you're yet to come up with a business idea, you'll learn how to research potential opportunities and find out if they have legs. The process of validating a business before you start it can save you

idiosyncratic preference shocks for remote work We characterize the parameter set in which the city exhibits multiple stationary equilibria Within this set a coordination mechanism can lead to stationary equilibria in which most workers commute or most of them work partially from home In these cases large shocks in the number of commuters like the recent lockdowns and self isolation generated by the COVID 19 pandemic can result in dynamic paths that make cities converge to a stationary equilibrium with large fractions of remote workers Using cell phone based mobility data for the U S we document that although most cities experienced similar reductions in CBD trips during the pandemic trips in the largest cities have stabilized at levels that are only about 60% of pre pandemic levels In contrast smaller cities have on average returned to pre pandemic levels House price panel data by city show consistent changes in house price CBD distance gradients We estimate the model for 274 U S cities and show that cities that have stabilized at a large fraction of remote work are much more likely to have parameters that result in multiple stationary equilibria Our results imply welfare losses in these cities that average 27%
