It examines the post-pandemic paradigm shift in educational practice in countries around the world and presents international case studies of emerging future practice. However, while it embraces the global context and the mega forces therein, it is specifically focused on the challenges for education in England today and the potential strategies for moving forward to the all-inclusive, personalised, smarter, and lifelong learning needed for tomorrow. In doing so, it explores how the new curriculum, models, new approaches to pedagogy, and new educational technology such as AI and even robotics might help to transform education in England, help level up learning, and help younger generations cope not only with the future as we know it but also the future that we don't.
