

INTERCULTURAL COMMUNICATION

Defining Intercultural Communication

Intercultural communication takes place when individuals influenced by different cultural communities negotiate shared meanings in interaction.¹ What counts as intercultural communication depends in part on what one considers a culture, and the definition of culture itself is quite contested. Some scholars take into the term “intercultural communication” to refer only to communication among individuals from different nationalities.² Other scholars, in contrast, expand the notion of intercultural communication to encompass other ethnic, race, religious, and other identity-related communities,³ as well as communication among individuals of different sexual orientations.⁴

In this sense, all interactions can be viewed along some continuum of “interculturality.” Interactions are most highly intercultural when individuals’ group identities are most salient in determining the values, perceptions, languages, nonverbal behaviors, and relational styles upon which those individuals draw. To the degree that interactions are taking more or less on an individual’s values, personality traits, and experiences, the interaction can be characterized as more interpersonal than intercultural. When individuals from different cultural backgrounds develop more intimacy, their interactions typically move along the continuum from more intercultural to more interpersonal. Though intercultural elements may overlap into a role, that ideal of seamless communication, sensitivity to intercultural factors is key to success.

Communication and Group Identity

Socialist theories of group identity recognize two types of group identity:⁵

1. **Assigned identity** is the set of demographic and role descriptions that others in an interaction assume to hold true for you. Assigned identity is often a function of one’s physical appearance, ethnic characteristics of one’s name, or other characteristic associations.
2. **Ascribed identity** is comprised of the group affiliations that one feels most strongly. For example, if an individual is ascribed to one’s race, culture, then the values and principles of that community culture will figure importantly in their personal values. A related concept is **reference group**. A reference group is a social entity from which one draws one’s personal identity. It is a group to which one feels connected and at ease.

Assigned and ascribed identity are important for understanding intercultural communication, because a person from another culture actually communicates with you based on your assigned identity, that is, how
