Limits Of Fiscal, Monetary, And Trade Policies, The: International Comparisons And Solutions Jonathan Edward Leightner, 2014-09-05 Sixteen countries across the world including the United States and many European nations have fallen into economic crises since the late 1990s In *The Limits of Fiscal Monetary and Trade Policies International Comparisons and Solutions* Jonathan E Leightner convincingly argues that the fundamental cause of the global malaise is a surplus of savings He provides compelling evidence via statistical estimates that fiscal monetary and trade policies cannot solve the resulting problems since their effectiveness has plummeted Leightner also shows that the solution to the current global economic woes is a consumption driven growth model which China advocates but has yet to fully implement because when there is insufficient consumption excess savings will remain idle seek a return from rent or deception or fund speculative bubbles
