2 2 First part Current generation and treatment of waste 2 2 1 What is waste The dictionary defines waste as something useless unwanted or defective and the word by product as something produced in an industrial or biological process in addition to the principal product From the point of view of sustainability the word waste does not have that meaning as though it may be unwanted it is not something useless and is certainly not defective Even if in a manufacturing process a product or part of it does not conform to the manufacturer s quality specs it does not thereby become waste but is rather scrap material that is usually brought back to its original state and then processed again **Teaching Learners of English in Mainstream Classrooms (K-8)** Linda New Levine,Mary Lou McCloskey,2009 Teaching Learners of English in Mainstream Classrooms is a unique resource designed to help K 8 classroom teachers integrate language learning into the content curriculum This book helps teachers teach their grade level curriculum even though they may have English language learners in their classrooms By using the strategies provided teachers can promote content achievement for all of their students Specifically written for content teachers Linda New Levine and Mary Lou McCloskey s clear and friendly writing
