

## Chemical Periodicity

Student: **XXXXXXXXXX**

Submission Date: **2023**

**Question:** The elements form the periodic law:

**Answer:** The elements form the periodic law.

**Explanation:** The periodic law states that the chemical and physical properties of the elements are a periodic function of their atomic number. This means that the elements are arranged in a periodic table, where the elements are grouped into periods and groups. The elements in the same group have similar chemical and physical properties, while the elements in the same period have different properties. The periodic law is a fundamental principle of chemistry, and it is the basis for the periodic table.

**Question:**

1. What is the periodic law? The periodic law states that the chemical and physical properties of the elements are a periodic function of their atomic number.
