Digital Media in EFL Classrooms, 2025-02-26 Seminar paper from the year 2024 in the subject English Language and Literature Studies / Linguistics, grade 1.0, University of Kaiserslautern, Anglistik course, Linguistics language English.

Abstract: Nowadays, English as a second language is more challenging for learners than ever. Shifting the focus on pronunciation teaching occasionally also puts more value on other issues like interference between sound systems in L2 classrooms. Technologies such as audio conferencing, video chat rooms, AI (Artificial Intelligence), and online learning platforms may have great potential to help learners overcome pronunciation difficulties. At the beginning of 2020, when COVID-19 struck down the globalized world and every country's educational sector, these insights became more than relevant. At this time, overstrained teachers and students had to provide and perceive everything through online resources only to acknowledge the benefits of media in pronunciation teaching after a short period.
