Network in 1996 it has had a profound impact in the changing role of today's modern dads who now view parenting as a shared responsibility. One of which is as the primary or part time shopper for their families. Since dads represent half the parenting population this book raises the following questions: Why don't companies view marketing to dads as an opportunity to increase revenue and potential profits? Why do companies and advertisers continue to ignore the purchasing power of dads? Why haven't companies conducted extensive studies on how dads buy products and services and also how to reach and connect with dads? Research clearly shows that the dynamics of today's families and role of parents continue to evolve. Yet companies and advertisers continue to use old school marketing strategies with mom as its primary target audience. Yes the thought of dads as a potential primary or even part time shopper is hard to embrace as it was decades ago when companies shied away from the thought of a woman becoming the primary breadwinner. The success of women in corporate America alone should indicate the reason for a change in a company or advertiser's marketing strategy. DADLY Dollars will introduce companies and advertisers to a new untapped consumer: dads. It will also teach them how to reach and connect with dads market to dads, capitalize on their purchasing power and how marketing to dads will increase their revenue, profit and brand loyalty. In addition it will also show a company the overall benefits to the economy, families and communities.
