Innovation Games Creating Breakthrough Products:

Innovation Games Luke Hohmann, 2006-08-28 Innovation Through Understandingsm The toughest part of innovation is accurately predicting what customers want, need, and will pay for. Even if you ask them, they often can't explain what they want. Now there's a breakthrough solution: Innovation Games. Drawing on his software product strategy and product management consulting experience, Luke Hohmann has created twelve games that help you uncover your customers' true hidden needs and desires. You'll learn what each game will accomplish, why it works, and how to play it with customers. Then Hohmann shows how to integrate the results into your product development processes, helping you focus your efforts, reduce your costs, accelerate time to market, and deliver the right solutions right from the start. Learn how your customers define success. Discover what customers don't like about your offerings. Uncover unspoken needs and breakthrough opportunities. Understand where your offerings fit into your customers' operations. Clarify exactly how and when customers will use your product or service. Deliver the right new features and make better strategy decisions. Increase empathy for the customers' experience within your organization. Improve the effectiveness of the sales and service organizations. Identify your most effective marketing messages and sellable features. Innovation Games will be indispensable for anyone who wants to drive more successful, customer-focused product development. Product and R D managers, CTOs, and development leaders, marketers, and senior business executives alike. The Gameful World Steffen P. Walz, Sebastian Deterding, 2015-01-23 What if every part of our everyday life was turned into a game? The implications of gamification. What if our whole life were turned into a game? What sounds like the premise of a science fiction novel is today becoming reality as gamification. As more and more organizations practice products and services are infused with elements from games and play to make them more engaging, we are witnessing a veritable ludification of culture. Yet while some celebrate gamification as a possible answer to mankind's toughest challenges, and others condemn it as a marketing ruse, the question remains: what are the ramifications of this gameful world? Can game design energize society and individuals, or will algorithmic incentive systems become our new robot overlords? In this book, more than fifty luminaries from academia and industry examine the key challenges of gamification and the ludification of culture, including Ian Bogost, John M. Carroll, Bernie DeKoven, Bill Gaver, Jane McGonigal, Frank Lantz, Jesse Schell, Kevin Slavin, McKenzie Wark, and Eric Zimmerman. They outline major disciplinary approaches, including rhetoric, economics, psychology, and aesthetics, tackle issues like exploitation, privacy, and survey, and main application domains such as health, education, design, sustainability, or social media. **Automated Invention for Smart Industries** Denis Cavallucci, Roland De Guio, Sebastian Koziółek, 2018-10-18 This book constitutes the refereed proceedings of the 18th International TRIZ Future Conference on Automated Invention for Smart Industries held in Strasbourg, France, in October 2018, and sponsored by IFIP WG 5.4.
