**Inside the BBC and CNN** Lucy Küng, 2000 Inside the BBC and CNN provides a unique insight into two of the world s best known media organisations during a period of great change and new challenges The BBC and CNN have very different histories remits and identities but both must now compete to provide news in a media environment being reshaped by increasing competition globalisation digitisation and convergence In addition they face increasing pressures of criticism focussed on the struggle for ratings and the perceived dumbing down of programming Drawing on intensive research carried out among senior managers in both organisations Lucy K ng Shankleman s study explores the beliefs and attitudes that shape management priorities and broadcasting policy More controversially it examines how each organisation's distinct cultural beliefs about broadcasting s fundamental purpose about the nature of competition and about the relationship between competition and quality have laid the foundations for their current and past success but could now threaten to limit their ability to respond to the unprecedented changes underway in the world's media landscape Inside the BBC and CNN Lucy Küng-Shankleman, 2012-11-12 Inside the BBC and CNN provides a unique insight into two of the world's best known media organisations during a period of great change and new challenges The BBC and CNN have very different histories remits and identities but both must now compete to provide news in a media environment being reshaped by increasing competition globalisation digitisation and convergence In addition they face increasing pressures of criticism focussed on the struggle for ratings and the perceived dumbing down of programming Drawing on intensive research carried out among senior managers in both organisations Lucy K ng Shankleman's study explores the beliefs and attitudes that shape management priorities and broadcasting policy More controversially it examines how each organisation s distinct cultural beliefs about broadcasting s fundamental purpose about the nature of competition and about the relationship between competition and quality have laid the foundations for their current and past success but could now threaten to limit their ability to respond to the unprecedented changes underway in the world's media landscape Inside the BBC and CNN Lucy Küng-Shankleman, 2012-11-12 Inside the BBC and CNN provides a unique insight into two of the world's best known media organisations during a period of great change and new challenges The BBC and CNN have very different histories remits and identities but both must now compete to provide news in a media environment being reshaped by increasing competition globalisation digitisation and convergence In addition they face increasing pressures of criticism focussed on the struggle for ratings and the perceived dumbing down of programming Drawing on intensive research carried out among senior managers in both organisations Lucy K ng Shankleman s study explores the beliefs and attitudes that shape management priorities and broadcasting policy More controversially it examines how each organisation's distinct cultural beliefs about broadcasting s fundamental purpose about the nature of competition and about the relationship between competition and quality have laid the foundations for their current and past success but could now threaten to limit their

This is the essential guide to change and management in the media industries ideal for students of media studies media economics and media management The Moving Image ,2003 **Television Industries** Douglas Gomery, Luke Hockley, 2006-05-31 While not a production study this book attempts to provide an insight into the inner workings of the television industry As such its central concern is with processes not texts or techniques or histories Television Industries focuses on the essential elements of the industry the policy and regulatory frameworks the swiftly changing world of video production technology all of which provides the backdrops against which broadcasters shape and sell their products The book also examines the working practices of scheduling budgeting selling advertising air time and so forth Where issues may be familiar to readers for example debates around public service broadcasting the entries aim to be explanatory and fresh Of course it s not possible to cover every aspect of what is a complex and ever changing industry Nonetheless the aim is to provide a starting point for students and new scholars as they start to research into the nature of the broadcasting industry Hence this volume is extensively cross referenced to guide the reader as they tease out for themselves some of the complexity of this industry There are several other elements that are distinctive about this volume Perhaps the most striking of these is its blend of contributions from the UK and US This book will raise as many questions as it provides answers It aims to make a contribution to the on going debates in the now well established world of television
