

Intermittent Fasting for Building Muscle – the Kinobody Way

The Aggressive Fat Loss Program – by Greg O’Gallagher

The Fundamentals of Building Muscle That You Can’t Ignore

- Intermittent fasting alone will not build muscle.
- Although, fasting does have many benefits that help the muscle building process, and *we’ll get to those in a moment...*
- Muscle growth is going to be triggered by **progressive overload and consistently getting stronger**. There’s no getting around this.
- It’s the main reason the [Greek God Program](#) is crafted for the fastest rate of strength gain possible. Muscle is a byproduct of strength, get stronger and you will grow.
- Over the course of a couple months, if your key lifts go up 25 lbs, you’re going to build muscle. If you keep your nutrition dialed in to minimize fat gain, you’ll be blown away with the results

Its Simple Really, Build Muscle by gaining strength!

- It’s really the most sensible way to build a great physique and there’s no need to complicate it.

inflammation boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods There are different forms of intermittent fasting so if you want to fast responsibly then you should find the type of fasting that suits you best For instance there is the 16 8 fasting where you fast for 16 hours and then eat your meals within the remaining 8 hours Then there is the alternate day fast where you fast on one day and eat normally the next You may also choose the extended fast where you fast for a longer period of time such as 8 days or more Traditional fasting has proven to be ineffective with many people unable to cope with the tough requirements Ordinarily people would fast from dawn to dusk for probably an entire month having to endure days on end without proper meals Then once the benefits of fasting are achieved they would resume normal life only for the problems to creep back again This can be very frustrating Fortunately intermittent fasting solves this challenge Rather than go through lengthy periods of fasting all you need to do is identify the most suitable intermittent type of fasting For instance you may choose the 16 8 format where you go for 16 hours without eating anything and only eat within an 8 hour window in any given day Fortunately the 16 hours of fasting include your sleeping time so you will be asleep for about half of that time Intermittent fasting has gained popularity because it offers choice is easy to handle and has a lot of benefits but without the rigors and disadvantages of traditional ways of fasting If you need to lose weight look great reduce inflammation boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods
