## Basic Networking Questions And Answers With PDF

Networking questions

**(1) What is a network ?**

**Answer:** A **network** is the connection of two or more computers. These computers are linked together. The most common types of networks are:

- (a) Local Area Networks (LANs) and
- (b) Wide Area Networks (WANs).

The primary difference between the two is that a LAN is generally confined to a limited area, whereas a WAN covers a large area. Severally connected LANs creates a WAN.

Basically, the network is a connection made through the connecting links between two or more devices. You can even call it as the line configuration.
