Novel Financial Applications of Machine Learning and Deep Learning Mohammad Zoynul Abedin, Petr Hajek, 2023-03-01

This book presents the state of the art applications of machine learning in the finance domain with a focus on financial product modeling, which aims to advance the model performance and minimize risk and uncertainty. It provides both practical and managerial implications of financial and managerial decision support systems, which capture a broad range of financial data traits. It also serves as a guide for the implementation of risk-adjusted financial product pricing systems while adding a significant supplement to the financial literacy of the investigated study. The book covers advanced machine learning techniques such as Support Vector Machine, Neural Networks, Random Forest, K-Nearest Neighbors, Extreme Learning Machine, Deep Learning Approaches and their application to finance datasets. It also leverages real-world financial instances to practice business product modeling and data analysis. Software code such as MATLAB, Python and/or R, including datasets within a broad range of financial domain, are included for more rigorous practice. The book primarily aims at providing graduate students and researchers with a roadmap for financial data analysis. It is also intended for a broad audience including academics, professional financial analysts and policy makers who are involved in forecasting, modeling, trading, risk management, economics, credit risk and portfolio management.

Knowledge Management, Arts, and Humanities Meliha Handzic, Daniela Carlucci, 2019-03-28

This book presents a series of studies that demonstrate the value of interactions between knowledge management with the arts and humanities. The carefully compiled chapters show, on the one hand, how traditional methods from the arts and humanities, e.g., theatrical improvisation, clay modelling, theory of aesthetics, can be used to enhance knowledge creation and evolution. On the other, the chapters discuss knowledge management models and practices such as virtual knowledge space, BA design, social networking and knowledge sharing, data mining and knowledge discovery tools. The book also demonstrates how these practices can yield valuable benefits in terms of organizing and analyzing big arts and humanities data in a digital environment.
