is where we depart from a discussion of technology again and will instead discuss how security is accomplished in an organization. Because we know that we will not be absolutely successful in our security efforts, attackers are always finding new holes and ways around our security defenses. One of the most important topics we will address is the subject of security incident response and recovery. Also included is a discussion of change management addressing the subject we alluded to earlier when addressing the problems with patch management, security awareness and training, incident response and forensics.
