*On Creativity* David Bohm, 2004-09-01 Creativity is fundamental to human experience In *On Creativity* David Bohm the world renowned scientist investigates the phenomenon from all sides not only the creativity of invention and of imagination but also that of perception and of discovery This is a remarkable and life affirming book by one of the most far sighted thinkers of modern time Science, Order, and Creativity David Bohm, F. David Peat, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company **On Creativity** Lee Nichol, 2003-08-29 Creativity is fundamental to human experience In *On Creativity* David Bohm the world renowned scientist investigates the phenomenon from all sides not only the creativity of invention and of imagination but also that of perception and of discovery This is a remarkable and life affirming book by one of the most far sighted thinkers of modern times *The Grand Designer: Discovering the Quantum Mind Matrix of the Universe* graham smetham, 2010-10-31 A thorough investigation of the implications of quantum theory for the Philosophy of Religion This book shows that Stephen Hawking is incorrect when he says that modern physics disproves God In fact his own book *The Grand Design* requires the existence of an infinite Cosmic Mind *The Grand Designer*

*Quantum Buddhist Wonders of the Universe* Graham Smetham, 2012-07-04 An exploration of the implications of the meeting of Quantum Physics and Buddhist metaphysics for our understanding of paranormal phenomenon The quantum nature of telepathy The quantum truth of rebirth The holographic principle and enlightenment Advanced states of consciousness in Buddhist jhana meditation and the psychology of Abraham Maslow The misleading ideas of Brian Cox and Jim Al Khalali Michael Mensky's Quantum Concept of Consciousness and much more **Raul Ruiz's Cinema of Inquiry** Ignacio López-Vicuña, Andreea Marinescu, 2017-12-04 Students and scholars of film and media studies will find great value in this collection **In the Middle** Teong Eng Tan, 2016-04-05 The French philosopher Gilles Deleuze remarked in his book *Negotiations* that Things and thoughts advance or grow out from the middle and that's where you have to get to work that's where everything unfolds This prompts the question How does an artist get to work in the middle of a process that is continuously becoming The thesis is an unfolding narrative of the author's attempt to experientially answer the question by way of an art practice leading to an examination of the issue of freedom freedom from attachments and freedom to create new possibilities with all for all The thesis offers a view that art practice exploring ways to break free from the bondage of the mind moments of freedom from oneself is spiritual practice is life practice *Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma* Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger's Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both

localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebah Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting

conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of *Disciplinary Decadence Living Thought in Trying Times* Routledge Paradigm 2006 and *Freedom Justice and Decolonization* Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi's *Liberating Sociology* succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

**Seen and Not Heard** Jana Mohr Lone, 2021-04-26 A 2022 Choice Reviews Outstanding Academic Title How might society benefit if children were recognized as independent thinkers capable of seeing clearly and contributing in valuable ways to our world How would children's lives change if what they said was not often

ignored or patronized In a series of conversations with children about many of life's important philosophical questions *Seen and Not Heard* reveals children as perceptive and original thinkers Guided by discussions about the meaning of childhood friendship justice and fairness happiness and death the book invites us to rethink our beliefs about children and become more receptive to the ways we can learn from them *Fearless Change and Social Action in Difficult Times* Paula Donnelly Roark, 2024-10-31 Our divided politics unable to solve the challenges we face concerning society's hierarchies of injustice poverty endless war and climate change are now backtracking to even more division But the reality goes far deeper than the simple politics of left and right For true change we need something more profound a culture shift a collective change of consciousness *Fearless Change and Social Action in Difficult Times* argues that culture shifts don't just happen they require a strong focus on social and cultural human connection which neither political nor economic power can provide alone It is only deep participation and social integrative power which have the capacity to create these necessary cultural and societal transformations Developing awareness in participatory groups of thought worlds which remain out of sight but give cover to the implicit rules of culture and society is the first step to creating shared awareness of constructs and negative thought worlds that subconsciously support inequality Consciously putting aside those that are negative allows for the emergence of new positive realities and social movements Thus the real revolution is of the mind It does take courage but this is the process by which better futures are created Offering significant contributions to sociology and social theory this book promotes an understanding that societal change is rooted in social power and cultural shifts Inclusive in its presentation students professors NGO professionals volunteers activists and interested observers will find this book of high interest
