been debated by scholarly camps broadly described as primitivist substantivist modernist and Marxist and involving political economists sociologists and anthropologists as well as historians and classicists Ancient Athens and modern ideology demonstrates the dialectic of intellectual and substantive history and offers a consensual resolution to the debate by examining the interplay of values theories and evidence in the contributions of Max Weber 1864 1920 Karl Polanyi 1886 1964 and Moses Finley 1912 86 widely recognised as successive champions of the primitivist cause Pursuing Finley s own official account of his intellectual roots and hegemonic perspective the book starts with Weber and Polanyi and ends by finding the actual views of all three far more complex than generally assumed by their followers and critics Through systematic scrutiny and contextualisation of tensions in their work arising from the resistance of facts ancient and modern to theories and the varied dissonance of both with ideological priorities the case for a radical reconsideration of the debate and its protagonists is argued The book concludes with an account of Athenian developments and institutions which draws on recent scholarship associated with modernism and Marxism as well as primitivism The work s interdisciplinary approach and multidisciplinary scope will be of major interest to all concerned with the historical sciences in the broad sense of the term *The Book Review* ,1993 Max Weber the theory of Social and Economic Organization ,1968 **Theorizing Modernity** Peter Wagner,2001-03-20 This book argues that sociology has lost its ability to provide critical diagnoses of the present human condition because sociology has stopped considering the philosophical requirements of social enquiry The book attempts to restore that ability by retrieving some of the key questions that sociologists tend to gloss over inescapability and attainability The book identifies five key questions in which issues of inescapability and attainability emerge These are the questions of the certainty of our knowledge the viability of our politics the continuity of our selves the accessibility of the past and the transparency of the future The book demonstrates how these questions are addressed in different forms and by different intellectua **Globalization** Eleonore Kofman,Gillian Youngs,1996 Globalization and the related issues of power and identity are central concerns in international studies whether viewed from a political economic spatial or human perspective The fully updated second edition of this major collection brings together a multi disciplinary group of international scholars to interrogate globalization in theory and practice Gender identity citizenship migration issues related to the state and economic and technological change are analyzed in depth Several of the authors have revised their chapters from the earlier edition and others have provided completely new contributions in key areas such as the internet social movements environmental security and world cities Two new introductory chapters written by the editors outline the theory and practice of international relations and political geography at the dawn of the twenty first century Several further chapters highlight different aspects of inequality which have become central to the globalization debate Book jacket Max Weber and Modern Sociology ,1971 **Character and Identity: Philosophical foundations of political and sociological perspectives** Morton A. Kaplan,1998 Character and Identity Philosophical Foundations of Political and Sociological

Perspectives is designed by editor Morton A Kaplan to show despite the fundamental flaws in the classical Greek accounts of truth and knowledge why its quest for rational knowledge remains legitimate and vital to the concepts of character and identity To set the stage Part One includes a statement of the classical Greek position by Dean Jude Dougherty an account of the contemporary anticlassical stories position by John Simpson and an initial attempt to restore the Greek concept of rational inquiry by Lloyd Eby In subsequent chapters Kaplan restates the Greek position and shows why developments in science and philosophy are incompatible with the Greek concepts of truth and knowledge A brief excursus through the history of philosophy is intended to show how the Greek quest can be pursued in a manner consonant with the contemporary realm of knowledge In the course of this argument it will be shown why Leo Strauss who regarded contemporary philosophy as the prisoner of a mistaken seventeenth century paradigm fatally misconceived the role of seventeenth century philosophy and its relationship to contemporary thought Kaplan argues that contemporary philosophy is in large part a response to the breakdown of Hegel a great attempt to provide a modern alternative to Aristotle's synoptic philosophy an attempt that brings history and historicity into the center of the picture Kaplan shows why postmodernism is based on an incomplete and ultimately incoherent understanding of the consequences of the collapse of the Hegelian system and of the character of language In a version of pragmatism that restores the concept of objective truth Kaplan then explores the political and sociological aspects of this philosophical position and shows how it relates to character and identity He then shows how a weakly ordered but relevant position with respect to ethics and morals is consistent with a sustainable contemporary understanding of the quest for rational objective knowledge

Koch, 2006 Alienation as a theme deeply pervaded both the work and life of Max Weber one of the pillars of modern sociology In this excellent new book Andrew M Koch analyzes the genesis of the concept of alienation and then in a brilliant and imaginative turn works to recreate the context in which Weber understood alienation in both the intellectual and lived sense
