The Oxford Handbook Of Urban Planning Oxford Handbooks:

The Oxford Handbook of Urban Planning Randall Crane, Rachel Weber, 2012-05-24 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making *The Oxford Handbook of Urban Economics and Planning* Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2011-02-01 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap this book highlights the best scholarship in planning and economics that addresses the most pressing urban problems of our day and will stimulate further dialog between scholars in urban planning and urban economics The NPPF Handbook Gregory Jones KC, Simon Neate, 2025-09-04 Promising 1 5 million new homes by 2029 the new Labour government has made increased house building a central part of its growth agenda The National Planning Policy Framework NPPF is key to securing that If you really want to understand English planning policy and whether it s likely to achieve a better supply of homes economic growth less ugly more functional and higher quality places better health and well being and more biodiversity this Handbook will be invaluable In clear language it examines the meaning of the NPPF in a comprehensive and systematic way by reference to case law and appeal decisions The Handbook provides practical guidance on whether a policy paragraph has changed in substance or just its numbering Users will be able to assess whether previous authorities are still relevant Expertly co edited by Gregory Jones KC and Simon Neate MRTPI the book provides a unique commentary from a blended team of experienced specialist planning barristers from the leading planning chambers of Francis Taylor Building and planning transport and economics consultants from the international professional services firm WSP This definitive single volume guide to the NPPF will be essential reading for legal practitioners and professionals working in the field of planning *Elgar Encyclopedia in Urban and Regional Planning and Design* Kristof Van Assche, Raoul Beunen, Martijn Duineveld, 2023-12-11 This ground breaking Encyclopedia provides a

nuanced overview of the key concepts of urban and regional planning and design Embracing a broad understanding of planning and design within and beyond the professions it examines what planners and designers can do in and for a community **Global Heritage** Lynn Meskell,2015-06-22 Examines the social cultural and ethical dimensions of heritage research and practice and the underlying international politics of protecting cultural and natural resources around the globe Focuses on ethnographic and embedded perspectives as well as a commitment to ethical engagement Appeals to a broad audience from archaeologists to heritage professionals museum curators to the general public The contributors comprise an outstanding team representing some of the most prominent scholars in this broad field with a combination of senior and emerging scholars and an emphasis on international contributions

Social Interaction, Globalization and Computer-Aided Analysis Alexander Osherenko,2014-01-14 Tackling globalization is a great challenge it is both extremely beneficial and essentially problematic This comprehensive

multidisciplinary study confronts this ambivalence through the use of computer simulation. It discusses the findings of social interaction and social simulation through the use of understandable global examples. Readers can use this book as a tool to outline significant aspects of intercultural simulation and highlight the issues that need to be considered in the reader's analysis. The author leads the reader via sequential narration from a colloquial description of intercultural situations to final simulation prototypes; each step is accompanied by descriptive comments and program code. *Social Interaction, Globalization and Computer aided Analysis* shows the reader how to acquire intercultural data from seemingly inconceivable information sources. Researchers and software developers engaged in interdisciplinary research projects in the field of Human Computer Interaction will find this book to be a useful companion in their work. Alexander Osherenko is the founder of the start up company Socioware Development which implements psychologically, sociologically and culturally aware software that scrutinizes information based on the findings of the cognitive sciences. Solutions created by Socioware Development can be implemented across a vast spectrum of industries including car manufacturing, insurance and banking, Internet search engines and e retailers.

Architecture in Global Socialism Łukasz Stanek, 2020-01-14 How socialist architects, planners and contractors worked collectively to urbanize and develop the Global South during the Soviet era. In the course of the Cold War, architects, planners and construction companies from socialist Eastern Europe engaged in a vibrant collaboration with those in West Africa and the Middle East in order to bring modernization to the developing world. *Architecture in Global Socialism* shows how their collaboration reshaped five cities in the Global South: Accra, Lagos, Baghdad, Abu Dhabi and Kuwait City. Łukasz Stanek describes how local authorities and professionals in these cities drew on Soviet prefabrication systems, Hungarian and Polish planning methods, Yugoslav and Bulgarian construction materials, Romanian and East German standard designs and manual laborers from across Eastern Europe. He explores how the socialist development path was adapted to tropical conditions in Ghana in the 1960s and how Eastern European architectural traditions were given new life in 1970s Nigeria. He looks at how the differences between socialist foreign trade and the emerging global construction market were exploited in the Middle East in the closing decades of the Cold War. Stanek demonstrates how these and other practices of global cooperation by socialist countries, what he calls socialist worldmaking, left their enduring mark on urban landscapes in the postcolonial world. Featuring an extensive collection of previously unpublished images, *Architecture in Global Socialism* draws on original archival research on four continents and a wealth of in-depth interviews. This incisive book presents a new understanding of global urbanization and its architecture through the lens of socialist internationalism, challenging long-held notions about modernization and development in the Global South.
