The Sea and Civilization Lincoln Paine, 2013-10-29 A monumental retelling of world history through the lens of maritime enterprise revealing in breathtaking depth how people first came into contact with one another by ocean and river lake and stream and how goods languages religions and entire cultures spread across and along the world's waterways bringing together civilizations and defining what makes us most human Lincoln Paine takes us back to the origins of long distance migration by sea with our ancestors first forays from Africa and Eurasia to Australia and the Americas He demonstrates the critical role of maritime trade to the civilizations of ancient Egypt Mesopotamia and the Indus Valley He reacquaints us with the great seafaring cultures of antiquity like those of the Phoenicians and Greeks as well as those of India and Southeast and East Asia who parlayed their navigational skills shipbuilding techniques and commercial acumen to establish thriving overseas colonies and trade routes in the centuries leading up to the age of European expansion And finally his narrative traces how commercial shipping and naval warfare brought about the enormous demographic cultural and political changes that have globalized the world throughout the post Cold War era This tremendously readable intellectual adventure shows us the world in a new light in which the sea reigns supreme We find out how a once enslaved East African king brought Islam to his people what the American sail around territories were and what the Song Dynasty did with twenty wheel human powered paddleboats with twenty paddle wheels and up to three hundred crew Above all Paine makes clear how the rise and fall of civilizations can be linked to the sea An accomplishment of both great sweep and illuminating detail The Sea and Civilization is a stunning work of history

Mer Dans L'histoire Michel Balard, Christian Buchet, 2017 How important has the sea been in the development of human history Very important indeed is the conclusion of this ground breaking four volume work The books bring together the world's leading maritime historians who address the

question of what difference the sea has made in relation to around 250 situations ranging from the earliest times to the present. They consider across the entire world subjects related to human migration, trade, economic development, warfare, the building of political units including states and empires, the dissemination of ideas, culture, and religion, and much more, showing how the sea was crucial to all these aspects of human development.

*The Sea in History: The Medieval World* covers the period from the end of the Roman Empire in the West up to around the year 1500. It demonstrates that for many peoples and states in this period, the sea was central to their existence: the Vikings, the Hanse, Venice, Genoa, the Normans, and it shows also how important the sea was for states which are not normally thought of as maritime powers, such as Byzantium, the Crusader states, and the Mongol Empire. The book is global in its coverage, including material on East and Southeast Asia, Latin America, and the Caribbean, and Africa, with particularly interesting material on China's extensive voyages of exploration in the fifteenth century, the role of the Vikings in the early formation of Russia, and on the building of ships appropriate to local conditions in different parts of the world. 40 of the contributions are in English, 34 are in French.

*A Cultural History of the Sea in the Age of Empire* Margaret Cohen, 2024-09-19

Across the 19th century, maritime globalization expanded at a hitherto unimaginable pace, transforming transport and communications over the seas into oceanic networks at a planetary scale. These networks shaped culture in its most expansive sense, affecting seafaring, warfare, empire, commerce, communications, passenger travel, leisure, and science. Authors recover the sea experience of people and groups entangled with and yet neglected in an earlier generation of maritime history focused on conquest, empire, and knowledge. Thus, across a century when Britannia nominally ruled the waves, military control emerges as both opportunistic, harboring slavers as well as partial, giving agency to mutineers and enslaved crew members, including on the Royal Navy's own fleet, the wreck of Arctic exploring voyages such as the *Erebus* and the *Terror* takes readers to PanInuit exploration over sea ice around the Arctic circle; colonial and mercantile transport in the Indian Ocean reveals the role of lascars, the seafarers of color who for centuries had practiced these waters on the coasts of industrial nations; the professional establishment of marine sciences depends on the pathbreaking contributions of female amateur naturalists. As part of its revisionary aim, this volume gives voice to the physical environment. Thus, we discover contrasting perspectives about this environment under threat today of European mariners for whom it was deadly and treacherous, and for maritime Aborigines who lived in its shelter. Considering literature and art as well as history, authors further trace how the paradoxes of sea practice shape some of the most memorable ocean fantasies of the Western tradition, fostering both a celebration of work and technology and a preservation of secular magic in a disenchanted world.

**Maritime History and Identity** Duncan Redford, 2013 The sea and its relation to human life has always been a subject of fascination for historians For the first time this book looks at the field of Maritime History through the prism of identity looking at how the sea has influenced the formation of identity at a national local and individual level from the early modern age to the present It looks at a variety of people who interacted with the sea in different ways from merchant sailors to naval officers and on land from dockworkers to the civilians who participated in the sea based festivals in the Mediterranean port city of Messina A cultural strand runs through the volume with chapters focussing on the cultural construction of the naval hero in literature poetry music and art and an appraisal of the Japanese author and journalist It Masanori whose works had such a profound influence on Japan's post World War II national identity A key focus is the ways in which the Royal Navy influenced British identity at a national and regional level but other countries with a strong naval tradition such as Japan Italy and Germany are also analysed By bringing together a variety of themes related to identity this book provides the first attempt to thoroughly analyse the ways in which maritime historians have engaged with the question of identity in recent years In doing so it provides an important and unique addition to the historiography which will be essential reading for all scholars of maritime and naval history and those concerned with the question of identity Bloomsbury Publishing
