The Semantic Field Of Modal Certainty A Corpus Based Study Of English Adverbs Topics In English Linguistics:

The Semantic Field of Modal Certainty A. M. Simon-Vandenberg, Karin Aijmer, 2007 This book provides a detailed account of the syntactic semantic and pragmatic properties of modal adverbs of certainty in present day English Methodologically it relies on three types of data monolingual corpora translation corpora and informant testing It is the first study in which the semantic field of certainty as realised by English adverbs is explored English Modality Juana I.

Marín-Arrese, Marta Carretero, Jorge Arús Hita, Johan van der Auwera, 2013-12-12 The book presents new issues and areas of work in modality and evidentiality in English and in relation to other European languages French Galician Lithuanian Spanish Given the complexity of the relations among modal and evidential expressions their constant diachronic evolution and the variation found in different English speaking areas and in different genres and discourse domains the volume addresses the following issues the conceptual nature of modality the relationship between the domains of modality and evidentiality the evolution and current status of the modal auxiliaries and other modal expressions the relationship with neighbouring grammatical categories tense aspect mood and the variation in different discourse domains and genres in modelling stance and discourse identities

Modal Adjectives An Van Linden, 2012-02-22 The book revisits the notion of deontic modality from the perspective of an understudied category in the modal domain viz adjectives On the basis of synchronic and diachronic corpus studies it analyses the semantics of English adjectives like essential and appropriate and uses this to refine traditional definitions of deontic modality which are mainly based on the study of modal verbs In a first step it is shown that the set of meanings expressed by extraposition constructions with deontic adjectives is quite different from the set of meanings identified in the literature on modal verbs Adjectival complement constructions lack the directive meanings of obligation or permission which are traditionally regarded as the core deontic categories and they have semantic extensions towards non modal meanings in the evaluative domain In a second step the analysis of adjectives is used to propose an alternative definition of deontic modality which covers both the meanings of verbs and adjectives and which can deal with the different extensions towards modal and non modal categories This is integrated into a conceptual map which works both in diachrony defining pathways of change from premodal to modal to evaluative meaning and in synchrony accommodating refinements within each set of meanings In the process this study points to the emergence of partially filled constructions and it offers additional evidence for well established changes in the history of English such as the decline of the subjunctive and the rise of the to infinitive in complement constructions The book is of particular interest to researchers and graduate students with a focus on mood and modality and the interface between syntax semantics and pragmatics as well as that between synchrony and diachrony

Marin-Arrese, 2022-03-07 How are evidential functions distinguished by means other than grammatical paradigms i e by function words and other lexical units And how inventories of such means can be compared across languages against an account also of grammatical means used to mark information source This book presents an attempt at supplying a comparative survey of such inventories by giving detailed evidential profiles for a large part of European languages Continental Germanic English French Basque Russian Polish Lithuanian Modern Greek and Ibero Romance languages such as Catalan Galician Portuguese and Spanish Each language is treated in a separate chapter and their profiles are based on a largely unified set of concepts based on function and or etymological provenance The profiles are preceded by a chapter which clarifies the theoretical premises and methodological background for the format followed in the profiles The concluding chapter presents a synthesis of findings from these profiles including areal biases and the formulation of methodological problems that call for further research

Adverbs and Adverbials Olivier Duplâtre, Pierre-Yves Modicom, 2022-06-21 Adverbs seem to raise unsolvable issues for theories of word classes both crosslinguistically and language internally The contributions in this volume all address this categorial problem from a variety of formal and functional points of view In the first part current definitions of the class for Romance and Germanic languages are being questioned and improved drawing on data from English German and Italian The second part is devoted to adverbial scope in Romance French Italian and Brazilian Portuguese Germanic Modern Greek and Chinese under special consideration of modal adverbs subject oriented manner adverbs and domain adverbs and adverbials Syntactic and semantic relationships appear to lay the ground for a robust and fine grained functional definition of adverbs and adverbials

Modality is a semantic concept that covers notions such as possibility probability permission ability volition necessity and obligation The class of modals is in many languages both syntactically and semantically highly irregular and unpredictable modals frequently have idiosyncratic conjugational patterns and are subject to highly specialized syntactic rules One of the main characteristic of modal verbs is their relatively imprecise and indeterminate meaning their ambiguity the same modal can be deontic i e based on rules and regulations but it may also involve processes sets of knowledge or belief systems and thus get an epistemic interpretation In order to define the class of modals or to provide a set of environments in which a modal may be correctly or appropriately used one must refer to many levels of language the purely syntactic environment as well as the logical structure the context of the utterance the assumptions that are shared by the speaker and the addressee the social situation assumed by the participants in the discourse the impression the speaker wants to make on the addressee and so on There is also the question of the appropriate context environments that is the semantic pragmatic issue Therefore a complete analysis of a particular modal can only be achieved by looking both at its syntactic features and at its semantic structure in other words the syntax of a modal verb is based on its semantics and these two dimensions are inseparable

Adverb Placement Artemis Alexiadou, 1997-12-11 This monograph investigates a number of central issues in the Syntax of Adverbs with special reference to Greek in the light of Kayne s 1994 Antisymmetry Hypothesis It examines the conditions on the placement of the various adverb types their licensing requirements and their relation to adjectives The author advances

an analysis according to which adverbs are licensed as Specifiers of functional projections in the clausal domain. As such they enter a matching relation with the relevant features of the respective functional head. Adverbs are either directly merged at the relevant functional projection for instance Aspectual and Speaker Oriented adverbs or alternatively they are moved to this position from the complement domain of the verb for instance manner adverbs. Furthermore the volume examines the phenomenon of Adverb Incorporation. It is proposed that Incorporation is obligatory for those VP internal Adverbs which are structurally non complex in Chomsky's 1995 terms. Finally the similarities and differences between adverbs and adjectives clausal and nominal structure are investigated and a number of asymmetries between the two are highlighted.
