Clean Energy Tikendra Nath Verma,Thokchom Subhaschandra Singh,Upendra Rajak,Prerana Nashine,Gaurav Dwivedi,Ashwani Kumar,2024-12-10 The text discusses various technologies and methods that help in generating clean and renewable forms of energy It also covers the use of fuels in energy conversion media such as internal combustion engines and compares these with existing fossil fuels This book also focuses on green hydrogen revolution and the urban heat island effect This book covers topics such as sustainable biodiesel production photovoltaic PV device optimization and performance enhancement maximizing energy production and improving the overall efficiency reliability and performance of solar energy systems explains energy efficient green buildings blue green infrastructure high building energy demand solar chimney urban green spaces in reducing the urban heat island effect urban air quality building resilience to airborne pathogens and challenges related to urban green infrastructure discusses the carbon sequestration potential of urban parks the evolution of carbon capture utilization and storage CCUS technology hydrogen production technologies production and utilization of hydrogen as a future fuel for electric vehicles and the evaluation of carbon emissions from various vehicles presents solar based thermal energy systems optimizing solar air heater performance and solar integrated hydrogen production and utilization in India illustrates agro residue derived biochar for environmental management and competing alternative fuel technologies for commercial vehicles in India The book is primarily written for senior undergraduates graduate students and academic researchers in the fields of mechanical engineering environmental engineering energy engineering electrical engineering electronics and communications engineering automotive engineering and renewable energy **Advanced**

Applications in Heat Exchanger Technologies Sunil Kumar,Kavita Rathore,Debjyoti Banerjee,2025-08-13 Advanced Applications in Heat Exchanger Technologies presents the most recent developments in enhancing heat exchanger performance reliability and resilience including the implementation of Artificial Intelligence Machine Learning and Additive Manufacturing Covering the essential parts of many commercial endeavors ranging from aerospace to marine applications to oil and gas the book discusses various heat exchanger types and interdisciplinary industry applications It encompasses several different techniques such as nanofluids microchannel heat exchangers computer modeling advanced manufacturing and optimization The book addresses real world concerns that impact long term heat exchanger performance and dependability such as fouling corrosion prevention and maintenance measures This book is intended for researchers and graduate students who are interested in heat exchangers R D and the diverse range of industrial applications of heat exchanger technologies in contemporary practice **Machine Learning and Optimization for Engineering Design**

Apoorva S. Shastri,Kailash Shaw,Mangal Singh,2023-12-26 This book aims to provide a collection of state of the art scientific and technical research papers related to machine learning based algorithms in the field of optimization and engineering design The theoretical and practical development for numerous engineering applications such as smart homes ICT based

irrigation systems academic success prediction future agro industry for crop production disease classification in plants dental problems and solutions loan eligibility processing etc and their implementation with several case studies and literature reviews are included as self contained chapters Additionally the book intends to highlight the importance of study and effectiveness in addressing the time and space complexity of problems and enhancing accuracy analysis and validations for different practical applications by acknowledging the state of the art literature survey The book targets a larger audience by exploring multidisciplinary research directions such as computer vision machine learning artificial intelligence modified newly developed machine learning algorithms etc to enhance engineering design applications for society State of the art research work with illustrations and exercises along with pseudo code has been provided here **Revolutionizing**

Automated Waste Treatment Systems: IoT and Bioelectronics Khang, Alex,Vugar Abdullayev, Hajimahmud,Litvinova, Eugenia,Elmina Musrat, Gadirova,Avramovic, Zoran Ž.,2024-05-29 As the world grapples with pressing environmental challenges the need for sustainable solutions has never been more urgent From climate change to resource depletion our planet faces unprecedented threats that require immediate action Revolutionizing Automated Waste Treatment Systems IoT and Bioelectronics emerge as a beacon of hope offering comprehensive insights and practical guidance to address these critical issues By delving into the principles and applications of green technologies this book presents a roadmap towards a greener more sustainable future Recognizing the essential role that green technologies play in mitigating environmental degradation this book emphasizes concepts such as smart technologies bioelectronics and the internet of things It also illustrates how these innovations can be leveraged to create a more sustainable world Readers will be educated on the importance of adopting these technologies and the book provides actionable strategies for implementation Use this impressive resource to grasp a more holistic approach to environmental sustainability from designing green infrastructure to managing water resources *Recent Advances in Mechanical Engineering* Anil Kumar,Amit Pal,Surendra Singh

Kachhwaha,Prashant Kumar Jain,2021-05-25 This book presents the select proceedings of the second International Conference on Recent Advances in Mechanical Engineering RAME 2020 The topics covered include aerodynamics and fluid mechanics automation automotive engineering composites ceramics and polymers processing computational mechanics failure and fracture mechanics friction tribology and surface engineering heating and ventilation air conditioning system industrial engineering IC engines turbomachinery and alternative fuels machinability and formability of materials mechanisms and machines metrology and computer aided inspection micro and nano mechanics modelling simulation and optimization product design and development rapid manufacturing technologies and prototyping solid mechanics and structural mechanics thermodynamics and heat transfer traditional and non traditional machining processes vibration and acoustics The book also discusses various energy efficient renewable and non renewable resources and technologies strategies and technologies for sustainable development and energy environmental interaction The book is a valuable

reference for beginners researchers and professionals interested in sustainable construction and allied fields

Progressive Computational Intelligence, Information Technology and Networking Poonam Nandal, Mamta Dahiya, Meeta Singh, Arvind Dagur, Brijesh Kumar, 2025-07-22 Progressive Computational Intelligence Information Technology and Networking presents a rich and diverse collection of cutting edge research real world applications and innovative methodologies spanning across multiple domains of computer science artificial intelligence and emerging technologies This comprehensive volume brings together different scholarly chapters contributed by researchers practitioners and thought leaders from around the globe The book explores a wide array of topics including but not limited to machine learning deep learning cloud computing cybersecurity Internet of Things IoT blockchain natural language processing image processing and data analytics It addresses the practical implementation of technologies in sectors such as healthcare agriculture education smart cities environmental monitoring finance and more Each chapter delves into specific challenges frameworks and experimental outcomes making this book an essential reference for academicians researchers industry professionals and students who aim to stay ahead in the rapidly evolving digital world

Fundamentals of Engineering Thermodynamics R. Yadav ,2023-05-10 Thermodynamics deals with energy interactions between material bodies It is the science of 3E s namely Energy Entropy and Equilibrium The applications of its laws and principles are found in all fields of energy technology notably in steam gas and nuclear power plants internal combustion engines gas turbines jet propulsion refrigeration air conditioning compressors gas dynamics and direct energy conversion Starting with the basic concept the book discusses the important topics such as basic concepts heat and work energy ideal and real gases zeroth first and second laws of thermodynamics entropy and third law available energy and exergy gas power cycles vapour power cycles general thermodynamic relations refrigeration cycles psychrometry non reactive mixtures reactive mixture chemical equilibrium direct energy conversion compressible flows and heat transfer The book is an essential text for BE B Tech for Mechanical Engineering students UPSC and GATE examinations
