Benedict Anderson Imagined Communities :

Imagined Communities Benedict Richard O'Gorman Anderson, 1991 What makes people love and die for nations as well as hate and kill in their name While many studies have been written on nationalist political movements the sense of nationality the personal and cultural feeling of belonging to the nation has not received proportionate attention In this widely acclaimed work Benedict Anderson examines the creation and global spread of the imagined communities of nationality Anderson explores the processes that created these communities the territorialisation of religious faiths the decline of antique kingship the interaction between capitalism and print the development of vernacular languages of state and changing conceptions of time He shows how an originary nationalism born in the Americas was modularly adopted by popular movements in Europe by the imperialist powers and by the anti imperialist resistances in Asia and Africa This revised edition includes two new chapters one of which discusses the complex role of the colonialist state s mindset in the development of Third World nationalism while the other analyses the processes by which all over the world nations came to imagine themselves as old

An Analysis of Benedict Anderson's Imagined Communities Jason Xidias, 2017-07-05 Benedict Anderson s 1983 masterpiece *Imagined Communities* is a ground breaking analysis of the origins and meanings of nations and nationalism A book that helped reshape the field of nationalism studies *Imagined Communities* also shows the critical thinking skills of interpretation and analysis working at their highest levels One crucial aspect of Anderson s work involves the apparently simple act of defining precisely what we mean when we say nation or nationalism an interpretative step that is vital to the analysis he proceeds to carry out For Anderson it is clear that nations are not natural as historians and anthropologists are well aware nations as we understand them are a relatively modern phenomenon dating back only as far as around 1500 But if this is the case how can we agree what a nation is Anderson s proposed definition is that they are imagined communities comprising groups of people who regard themselves as belonging to the same community even if they have never met and have nothing in common otherwise The analysis that follows from this insight is all about examining and breaking down the historical processes that helped foster these communities above all the birth of printing and the development of capitalism Brilliantly incisive Anderson s analysis shows how good interpretative skills can form the foundations for compelling and original insight

De-territorializing Benedict Anderson's Imagined Communities Danielle Young, 2012

Represented Communities John D. Kelly, Martha Kaplan, 2001-09 In 1983 Benedict Anderson's Imagined Communities revolutionized the anthropology of nationalism Anderson argued that print capitalism fostered nations as imagined communities in a modular form that became the culture of modernity Now in Represented Communities John D. Kelly and Martha Kaplan offer an extensive and devastating critique of Anderson's depictions of colonial history his comparative method and his political anthropology The authors build a forceful argument around events in Fiji from World War II to the 2000 coups showing how focus on imagined communities underestimates colonial history and obscures the struggle over legal rights and political representation in postcolonial nation states They show that the self-determining nation state actually emerged with the postwar construction of the United Nations fundamentally changing the politics of representation Sophisticated and impassioned this book will further anthropology's contribution to the understanding of contemporary nationalisms

Faith Negotiating Loyalties Stephen W. Martin, 2008-09-11 Faith Negotiating Loyalties draws readers into the world of Christian faith in South Africa and the question of loyalties in the new post-apartheid state It carries out its investigation in two parts Part one examines Christian faith and loyalty during the first nation building exercise following the South African War positioning the creation and contestation of three Christianities corresponding to three nationalisms each of which imagined South Africa in a particular way shaping faith accordingly The idea of an undifferentiated South African Christianity gives way to contesting and contested Christianities nationalism gives way to nationalisms and faith emerges in tension with and in criticism of these loyalties Part two discusses the American theologian H. Richard Niebuhr in South Africa Three kinds of faith in his writings are set forth social faith radial faith and reconstructing faith Contextualized within the South African story Niebuhr's ideas

suggest self and society as constituted by hybridities and suspended in a web of loyalties Faith Negotiating Loyalties suggests the message for faith in a post apartheid South Africa is the importance of negotiating covenants which allow for crossings hybridities and contestations **Basque Nationalism and Benedict Anderson's Imagined Communities** Benjamin Yrungalay,2003 **Revival and Awakening** Adam H. Becker,2015-03-11 Most Americans have little understanding of the relationship between religion and nationalism in the Middle East They assume that the two are rooted fundamentally in regional history not in the history of contact with the broader world However as Adam H Becker shows in this book Americans through their missionaries had a strong hand in the development of a national and modern religious identity among one of the Middle East s most intriguing and little known groups the modern Assyrians Detailing the history of the Assyrian Christian minority and the powerful influence American missionaries had on them he unveils the underlying connection between modern global contact and the retrieval of an ancient identity American evangelicals arrived in Iran in the 1830s Becker examines how these missionaries working with the Nestorian Church of the East an Aramaic speaking Christian community in the borderlands between Qajar Iran and the Ottoman Empire catalyzed over the span of sixty years a new national identity Instructed at missionary schools in both Protestant piety and Western science this indigenous group eventually used its newfound scriptural and archaeological knowledge to link itself to the history of the ancient Assyrians which in time led to demands for national autonomy Exploring the unintended results of this American attempt to reform the Orient Becker paints a larger picture of religion nationalism and ethnic identity in the modern era
