Learning Go Jon Bodner, 2024-01-10 Go has rapidly become the preferred language for building web services. Plenty of tutorials are available to teach Go's syntax to developers with experience in other programming languages, but tutorials aren't enough. They don't teach Go's idioms, so developers end up recreating patterns that don't make sense in a Go context. This practical guide provides the essential background you need to write clear and idiomatic Go. No matter your level of experience, you'll learn how to think like a Go developer. Author Jon Bodner introduces the design patterns experienced Go developers have adopted and explores the rationale for using them. This updated edition also shows you how Go's generics support fits into the language. This book helps you write idiomatic code in Go and design a Go project. Understand the reasons behind Go's design decisions. Set up a Go development environment for a solo developer or team. Learn how and when to use reflection, unsafe, and cgo. Discover how Go's features allow the language to run efficiently. Know which Go features you should use sparingly or not at all. Use Go's tools to improve performance, optimize memory usage, and reduce garbage collection. Learn how to use Go's advanced development tools.

Teaching Text Features to Support

Comprehension Michelle Kelley, Nicki Clausen-Grace, 2015-05-26 When K-5 students understand how to read text features like diagrams, bullets, insets, and tables, they are reading the whole page essential for deep comprehension of nonfiction and fiction text. In this revised edition of *Reading the Whole Page: Teaching and Assessing Text Features to Meet K-5 Common Core Standards*, seasoned educators Michelle Kelley and Nicki Clausen-Grace show you how to explicitly teach K-5 students to read text features, use them to navigate text, and include them in their own writing. The classroom-proven mini-lessons, activities, and assessment tools in *Teaching Text Features to Support Comprehension* help you teach relevant Common Core State Standards and grade-level expectations, diagnose, monitor, and meet student needs with one of two level-appropriate assessments, evaluate knowledge with a unique picture book that can be downloaded, that illustrates all the text features, and monitor and guide differentiated instruction with a convenient class profile. Sixty mini-lessons for teaching print, graphic, and organizational features provide ample choices for meeting the standards while adapting to students' needs. Flexible lessons which follow the gradual release of responsibility model and increase in difficulty can be used within the typical 90-minute reading block during content area instruction in small groups and as part of independent practice opportunities like literacy centers. Each lesson offers concept review, suggestions for differentiation, assessment options, and technology connections requiring students to find, explore, manipulate, and create text features in their own writing. Even more activities from text feature walks to scavenger hunts help students integrate text feature knowledge as they read. The downloadable materials provided online include important resources and convenient lesson supports such as interactive think sheets that can be filled out directly on the computer, visual examples of each text feature, rubrics, the assessment picture book, and readers' theatre scripts.
