**Real Estate Valuation Theory** Ko Wang, Marvin L.

Wolverton, 2002-09-30 Is real property appraisal evolving or have all of the big ideas already been conceived This question has been circulating among the leaders of the Appraisal Institute during the past several annual meetings usually encountering little in the way of satisfying answers This is not too surprising because grand ideas and new knowledge do not

typically evolve from off hand conversation They are the product of focused intellectual activity and hours of difficult work This unquenched thirst for new knowledge is the primary reason for assembling this collection of new manuscripts dealing with valuation theory which was financially underwritten by the Appraisal Institute Their generosity and willingness to partner with the American Real Estate Society made this collection of thoughtful and thought provoking essays possible They are the result of a global response to a worldwide call for papers and demonstrate that real estate valuation is indeed an international discipline The United States Australia and New Zealand Southeast Asia the Pacific Rim and Europe are all represented by this impressive collection of authors Together the eighteen essays that make up this volume demonstrate that there are a sufficient number of big ideas to challenge and improve the appraisal profession for years to come Real Estate Valuation Theory is organized around five categories of intellectual contribution to the whole appraiser decision making and valuation accuracy application of nontraditional appraisal techniques such as regression and the minimum variance grid method appraising contaminated property ad valorem tax assessment and new perspectives on traditional appraisal methods One common thread is that all of the papers are exceptionally well written and thought provoking **Income Property**

Kahr,Michael C. Thomsett,2006-02-10 A fresh insightful look at how real estate professionals actually value properties and analyze markets The focus on different product types as well as market segments are especially useful Barry Hersh AICP Associate Professor of Real Estate and Urban Planning City University of New York This in depth look at the core tools of real estate valuation will show you how to analyze the real estate market and assess the financial feasibility of a project Many people go with their instincts or past experience when reviewing the financials and fail to utilize the useful data and analytical tools available in this field Get the analytical data and tools you need to assess the financial feasibility of any project Order your copy today *Going Concern Valuation* L. Deane Wilson MA ASA,Robin G. Wilson,2012-02-09 Our purpose in writing this book is multifaceted First this book aims to present a clear understanding of going concern valuations at the same time resolving the current misrepresentations surrounding the issue Additionally this book offers a new set of rules readers can use to determine which property types qualify as going concern valuations and which do not This book presents an understanding that in performing a Going Concern Valuation of properties which are perceived to have a business component it may not be possible to segregate allocate or value the components individually For example when appraising the going concern value of a motel with occupancy of 75% it could be argued and possibly proven that there is a value that can be separated from the overall value or going concern value to the business component On the other hand

however appraising that same motel with only 40% occupancy presents a completely different set of circumstances that could easily draw completely opposite conclusions It simply may be a lack of sufficient tools or data to argue and prove that the business component in fact has value separate from the real estate To do so with authority is tantamount to ignorance or arrogance
