Fundamentals of Data Communication Networks Oliver C. Ibe,2017-11-01 What every electrical engineering student and technical professional needs to know about data exchange across networks While most electrical engineering students learn how the individual components that make up data communication technologies work they rarely learn how the parts work together in complete data communication networks In part this is due to the fact that until now there have been no texts on data communication networking written for undergraduate electrical engineering students Based on the author s years of classroom experience Fundamentals of Data Communication Networks fills that gap in the pedagogical literature providing readers with a much needed overview of all relevant aspects of data communication networking addressed from the perspective of the various technologies involved The demand for information exchange in networks continues to grow at a staggering rate and that demand will continue to mount exponentially as the number of interconnected IoT enabled devices grows to an expected twenty six billion by the year 2020 Never has it been more urgent for engineering students to understand the fundamental science and technology behind data communication and this book the first of its kind gives them that understanding To achieve this goal the book Combines signal theory data protocols and wireless networking concepts into one text Explores the full range of issues that affect common processes such as media downloads and online games Addresses services for the network layer the transport layer and the application layer Investigates multiple access schemes and local area networks with coverage of services for the physical layer and the data link layer Describes mobile communication networks and critical issues in network security Includes problem sets in each chapter to test and fine tune readers understanding Fundamentals of Data Communication Networks is a must read for advanced undergraduates and graduate students in electrical and computer engineering It is also a valuable working resource for researchers electrical engineers and technical professionals

The Cybersecurity Body of Knowledge Daniel Shoemaker,Anne Kohnke,Ken Sigler,2020-04-08 The Cybersecurity Body of Knowledge explains the content purpose and use of eight knowledge areas that define the boundaries of the discipline of cybersecurity The discussion focuses on and is driven by the essential concepts of each knowledge area that collectively capture the cybersecurity body of knowledge to provide a complete picture of the field This book is based on a brand new and up to this point unique global initiative known as CSEC2017 which was created and endorsed by ACM IEEE

CS AIS SIGSEC and IFIP WG 11.8 This has practical relevance to every educator in the discipline of cybersecurity Because the specifics of this body of knowledge cannot be imparted in a single text the authors provide the necessary comprehensive overview In essence this is the entry level survey of the comprehensive field of cybersecurity It will serve as the roadmap for individuals to later drill down into a specific area of interest This presentation is also explicitly designed to aid faculty members administrators CISOs policy makers and stakeholders involved with cybersecurity workforce development initiatives The book is oriented toward practical application of a computing based foundation crosscutting concepts and essential knowledge and skills of the cybersecurity discipline to meet workforce demands Dan Shoemaker PhD is full professor senior research scientist and program director at the University of Detroit Mercy's Center for Cyber Security and Intelligence Studies Dan is a former chair of the Cybersecurity Information Systems Department and has authored numerous books and journal articles focused on cybersecurity Anne Kohnke PhD is an associate professor of cybersecurity and the principle investigator of the Center for Academic Excellence in Cyber Defence at the University of Detroit Mercy Anne's research is focused in cybersecurity risk management threat modeling and mitigating attack vectors Ken Sigler MS is a faculty member of the Computer Information Systems CIS program at the Auburn Hills campus of Oakland Community College in Michigan Ken's research is in the areas of software management software assurance and cybersecurity
